

(a) Norwegian fleet

- ecotoxicity: freshwater
- ecotoxicity: marine
- ecotoxicity: terrestrial
- human toxicity: carcinogenic
- human toxicity: non-carcinogenic
- climate change
- climate change w bio
- acidification: terrestrial
- eutrophication: freshwater
- eutrophication: marine
- particulate matter formation
- photochemical oxidant formation: human health
- photochemical oxidant formation: terrestrial ecosystems
- material resources: metals/minerals
- energy resources depletion: non-renewable
- ionising radiation
- land use
- ozone depletion
- water use

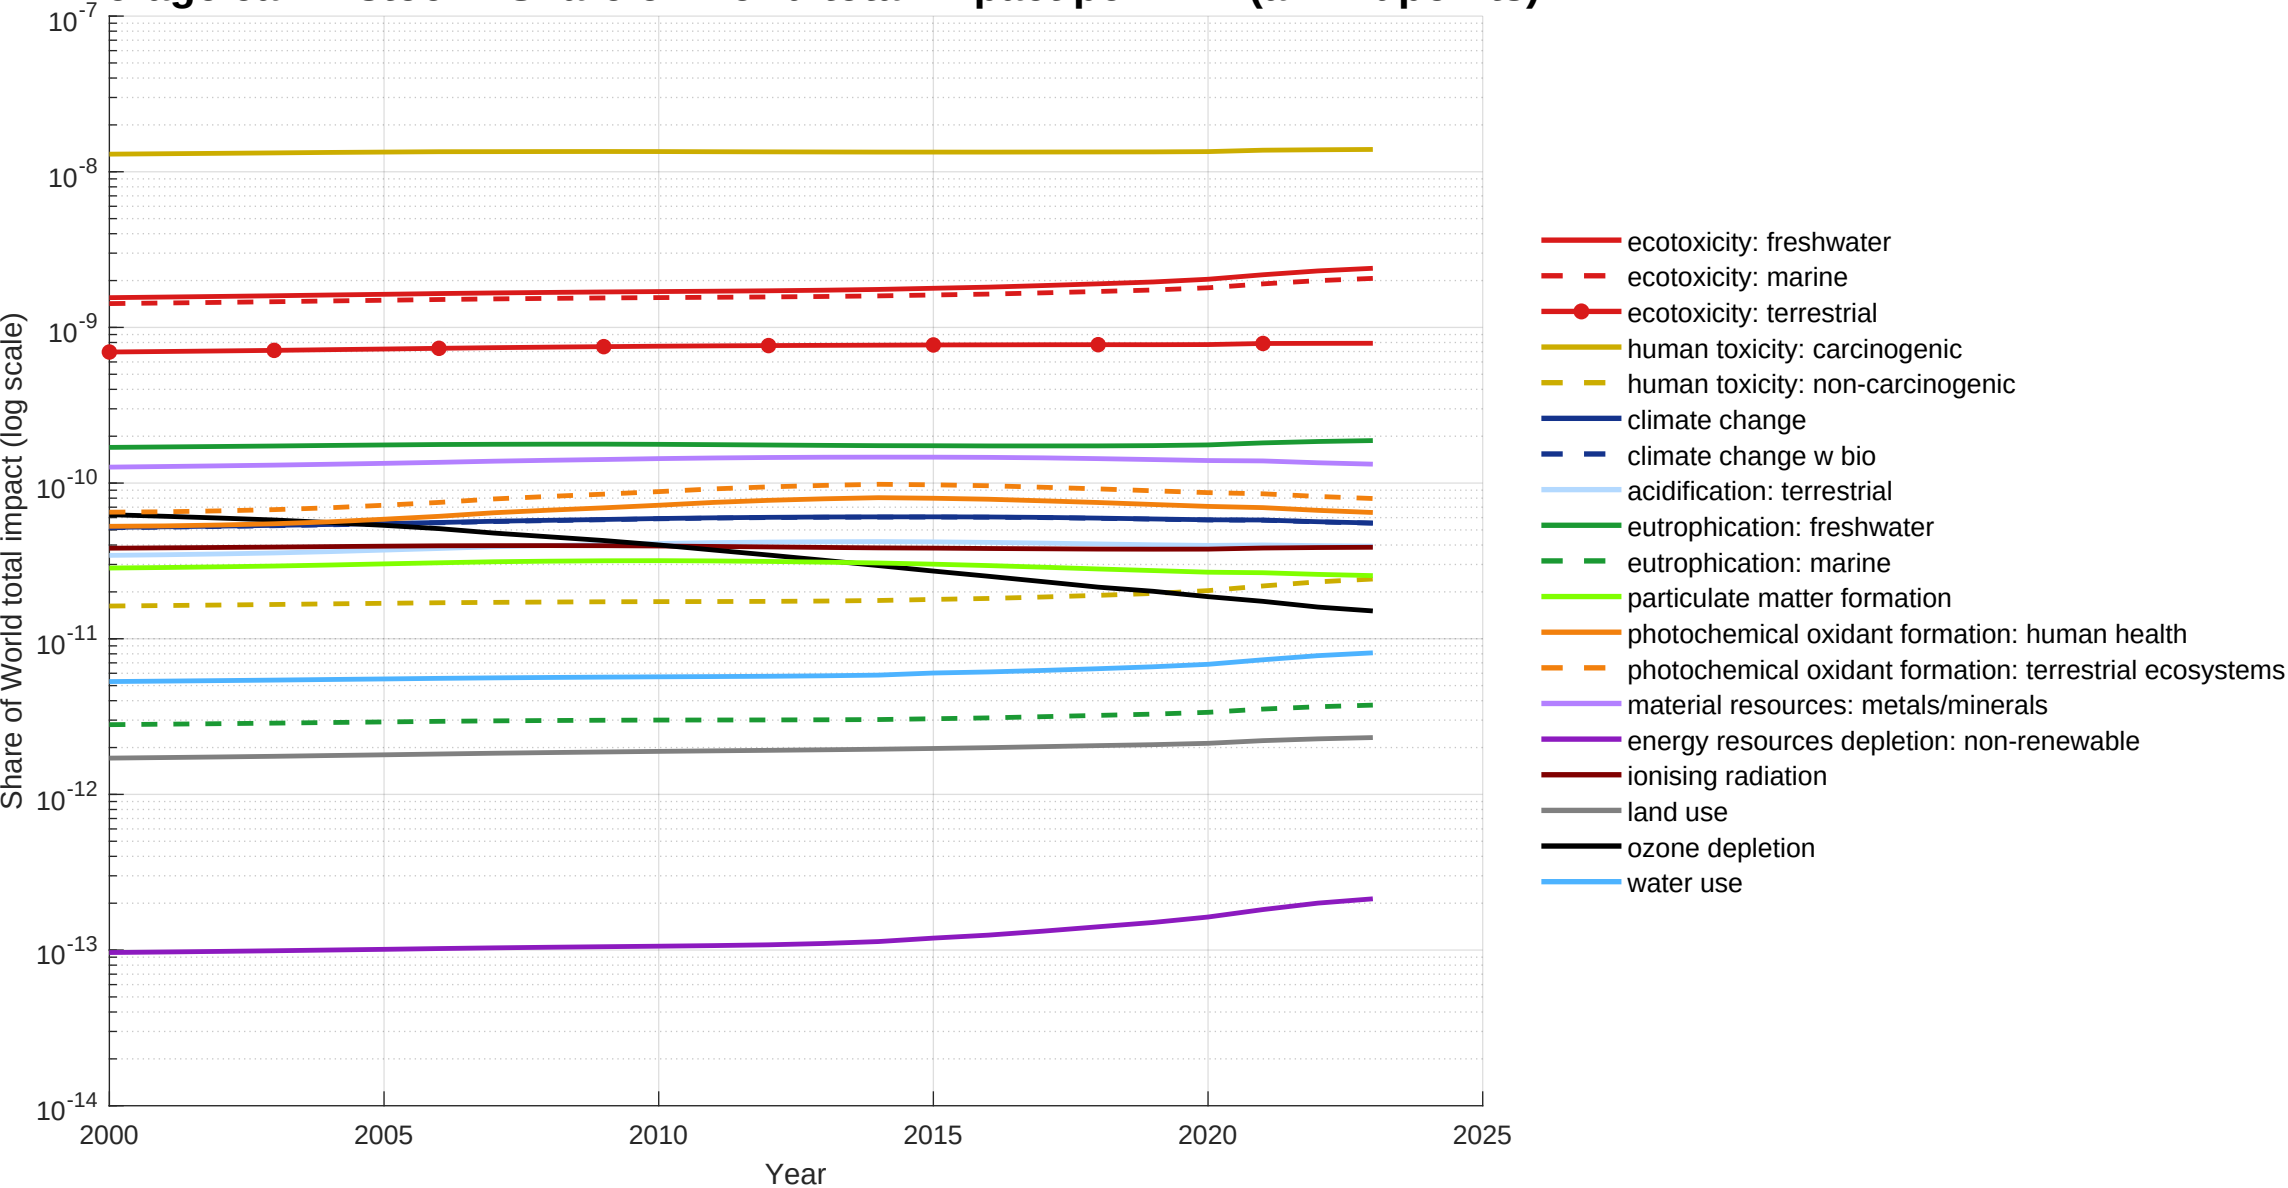

(b) New cars

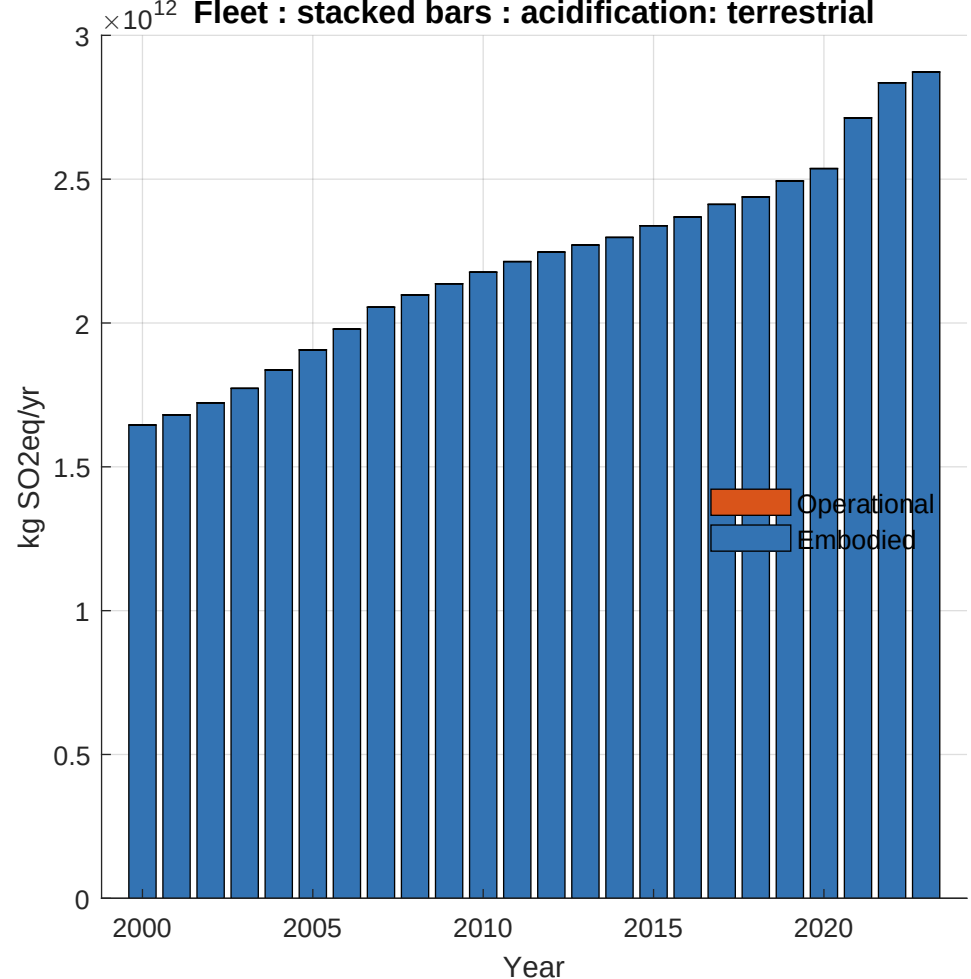

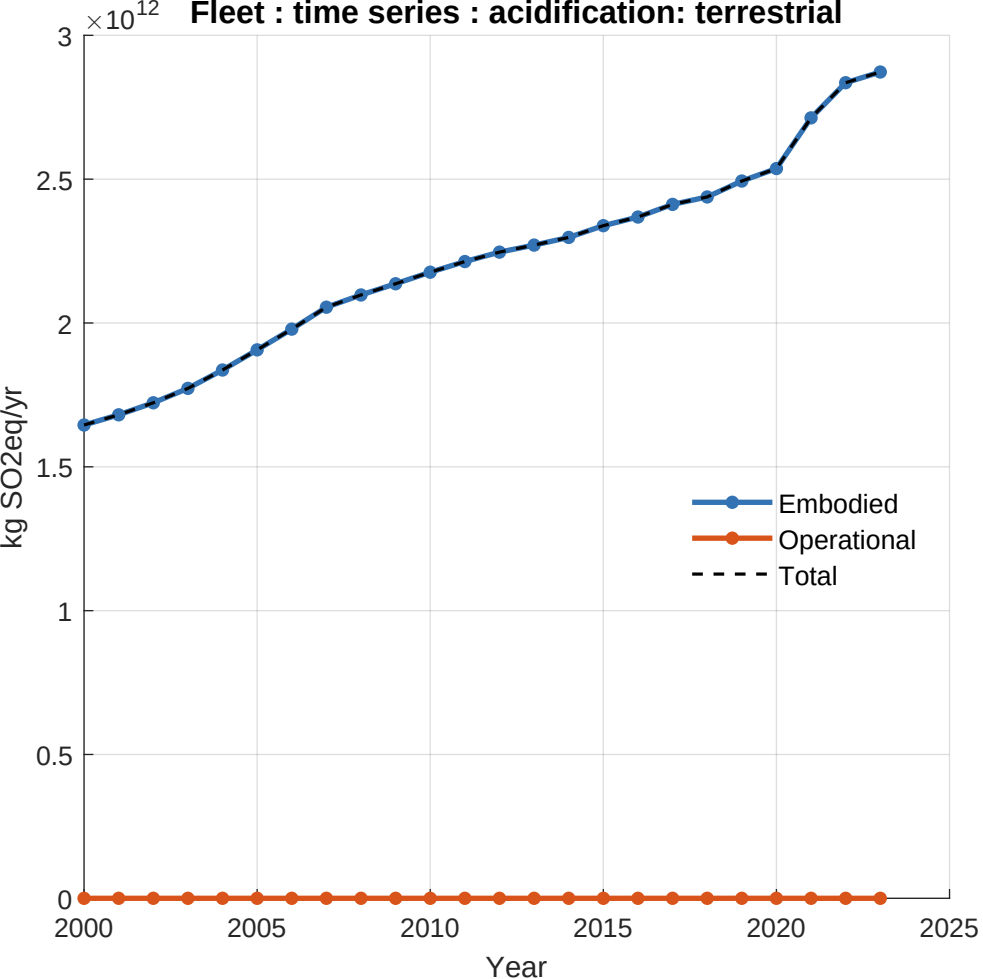

Share of World total impact (log scale)

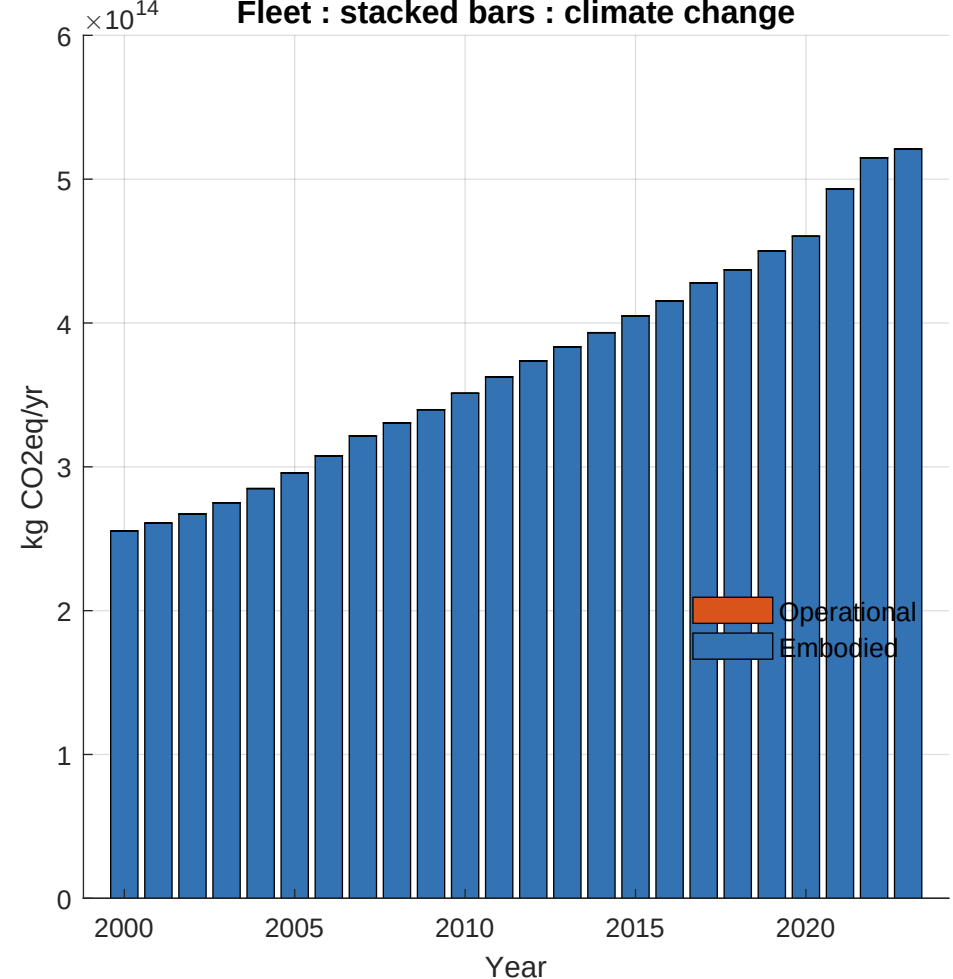

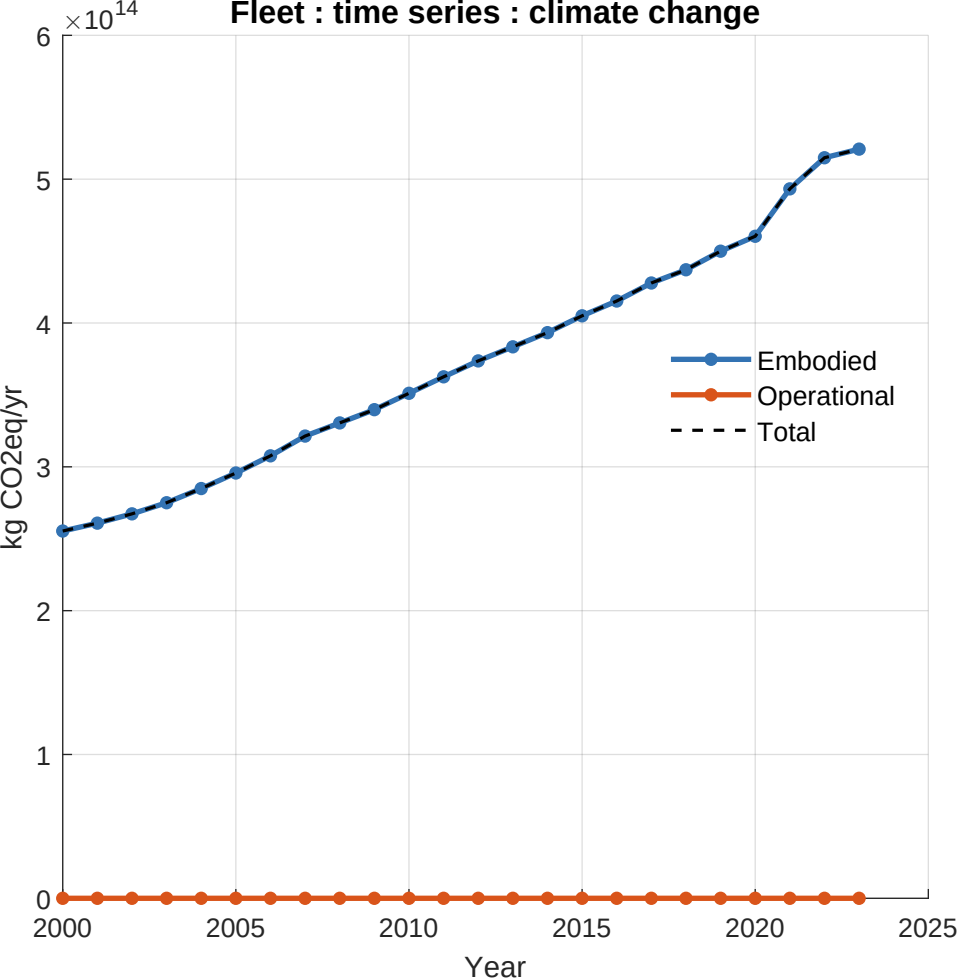

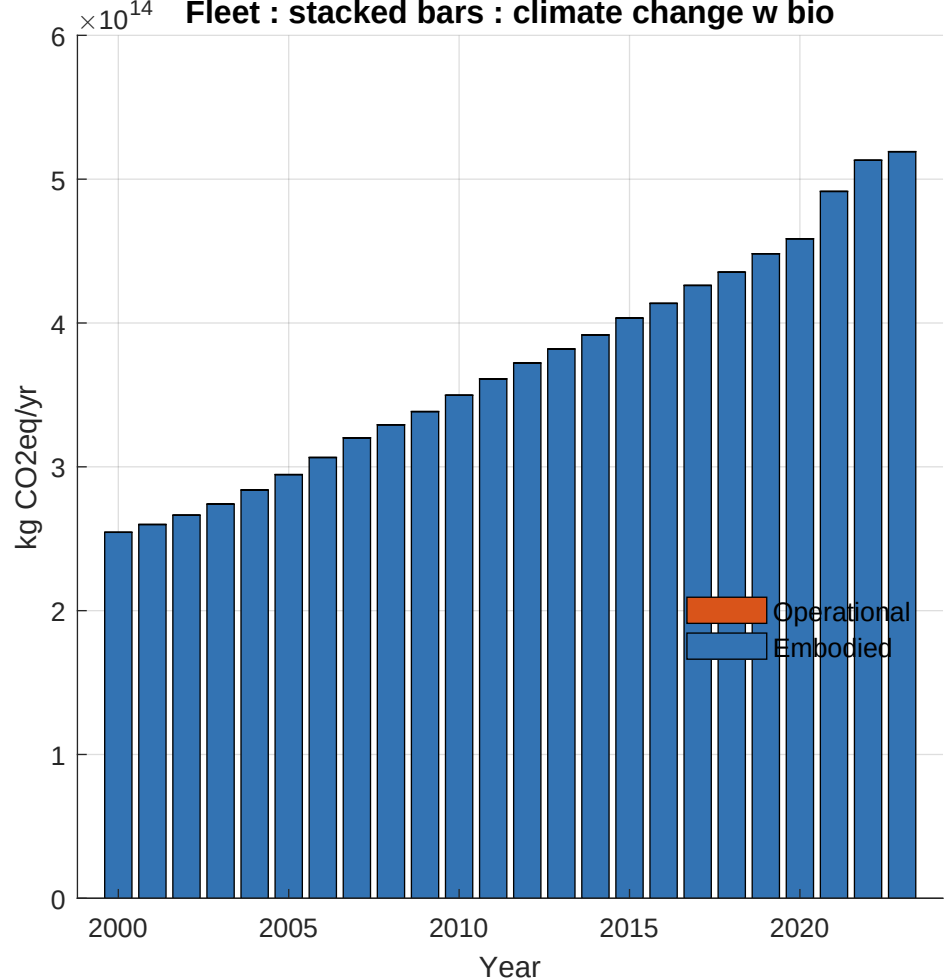

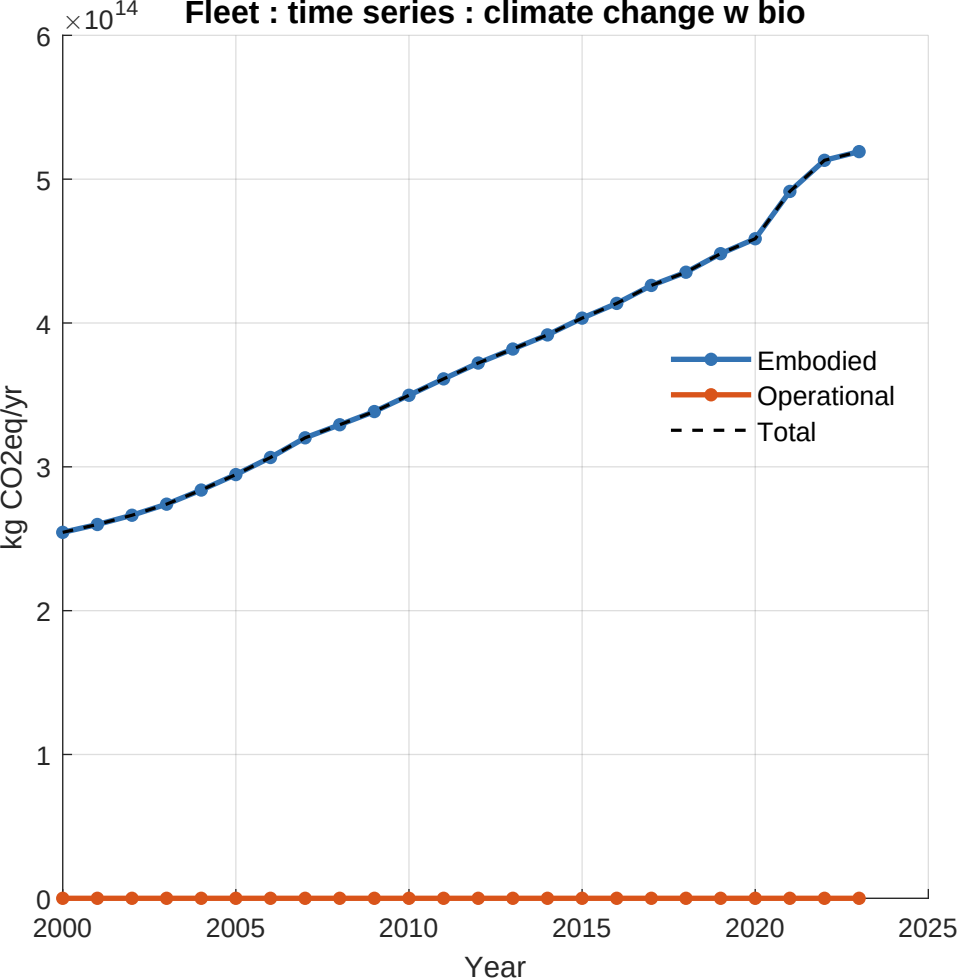

- ecotoxicity: freshwater
- ecotoxicity: marine
- ecotoxicity: terrestrial
- human toxicity: carcinogenic
- human toxicity: non-carcinogenic
- climate change
- climate change w bio
- acidification: terrestrial
- eutrophication: freshwater
- eutrophication: marine
- particulate matter formation
- photochemical oxidant formation: human health
- photochemical oxidant formation: terrestrial ecosystems
- material resources: metals/minerals
- energy resources depletion: non-renewable
- ionising radiation
- land use
- ozone depletion
- water use

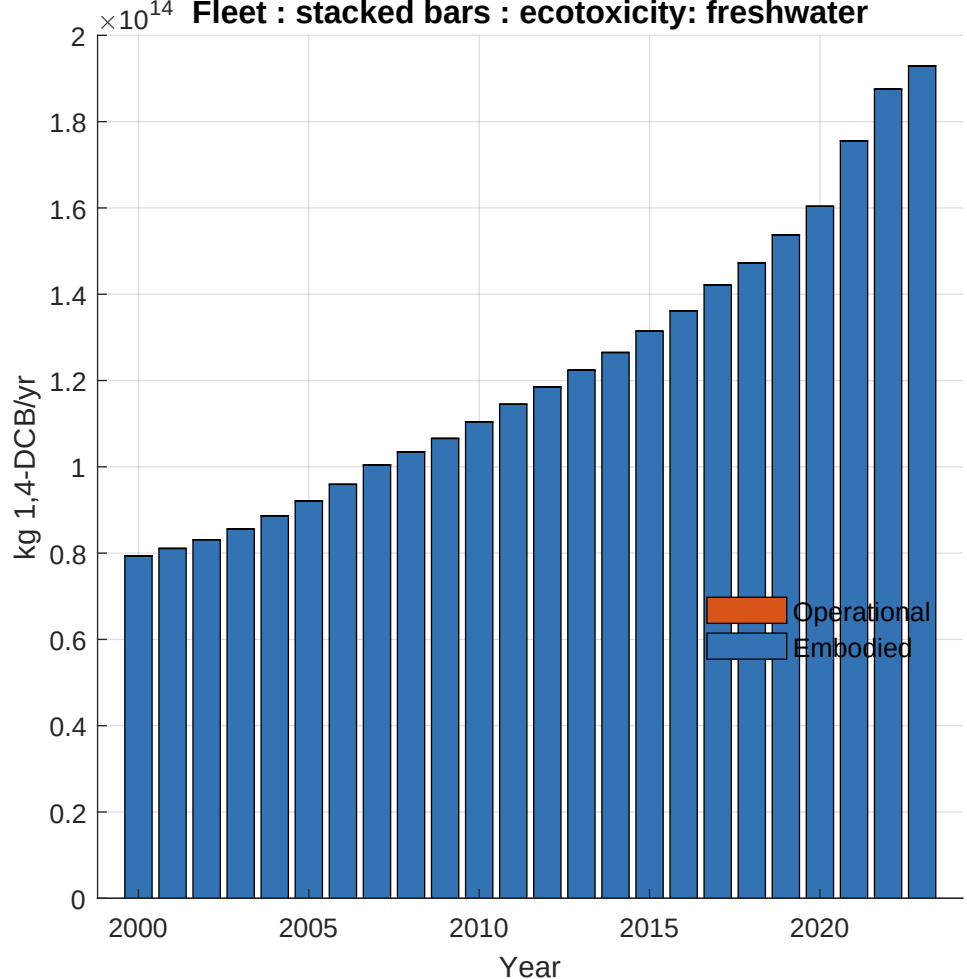

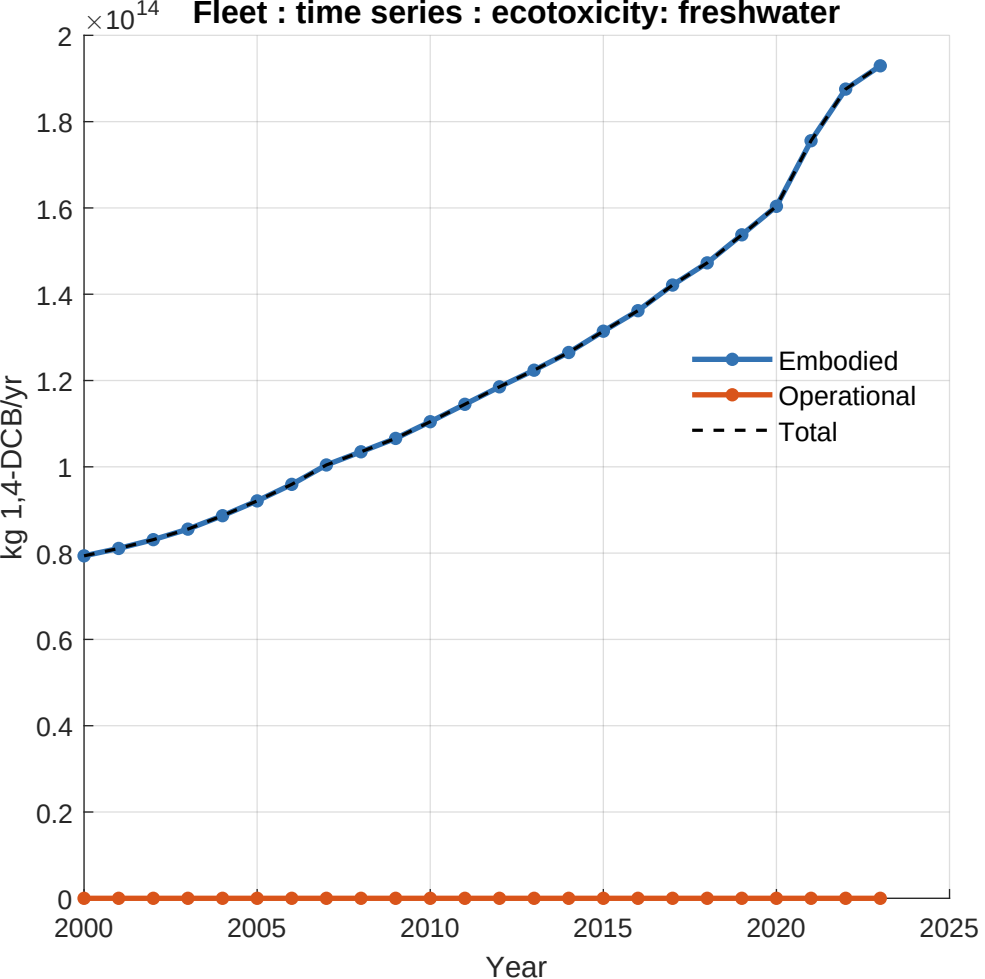

Average car in stock : Share of World total impact per vkm (all midpoints)

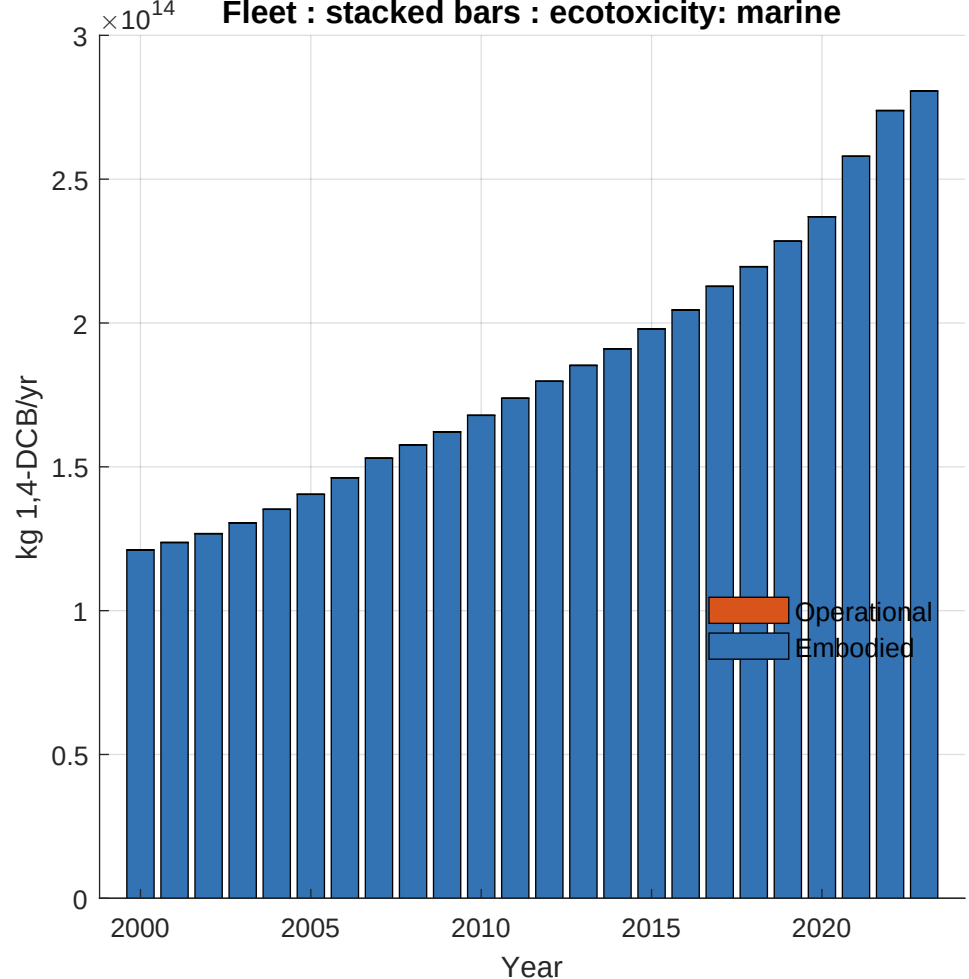

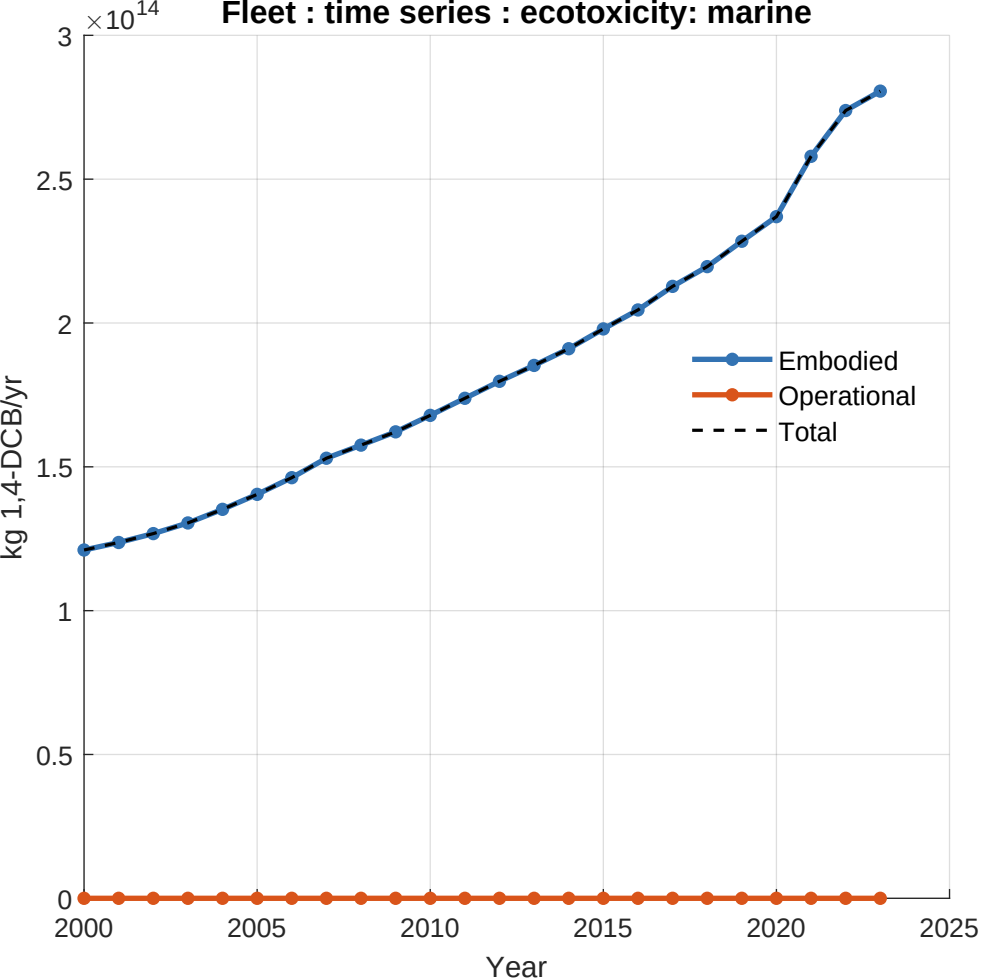

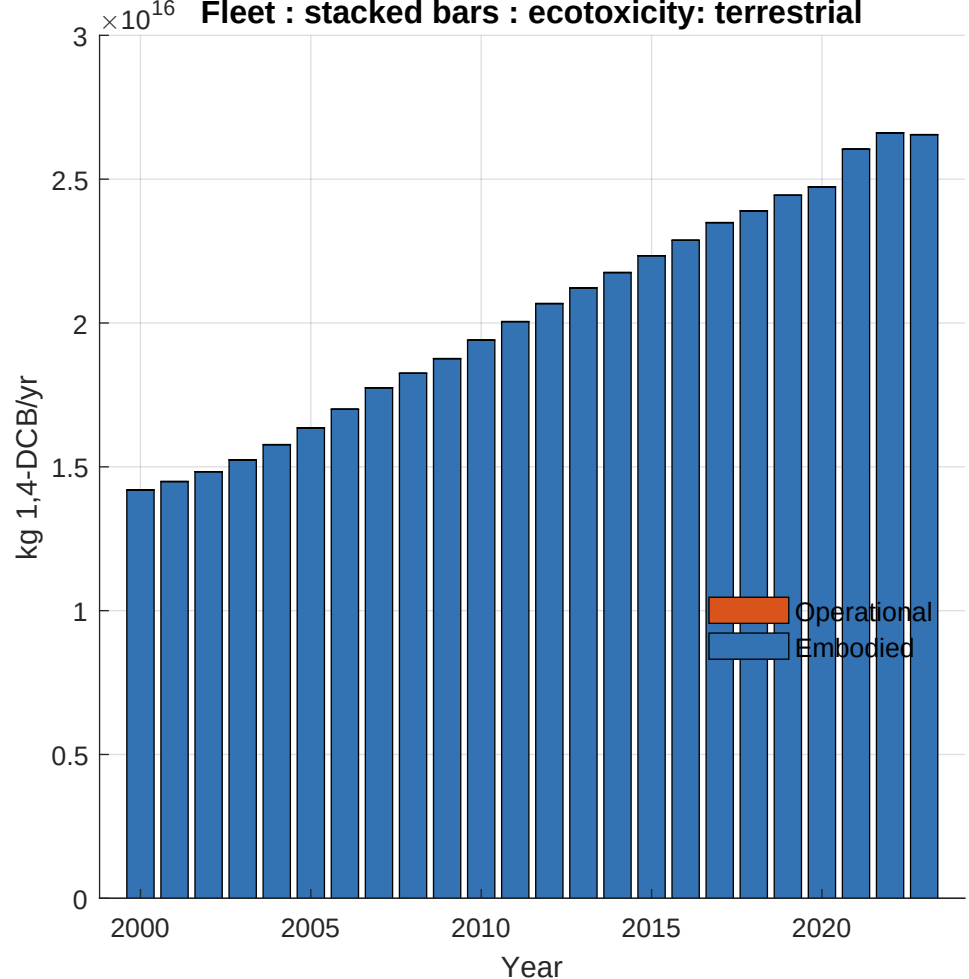

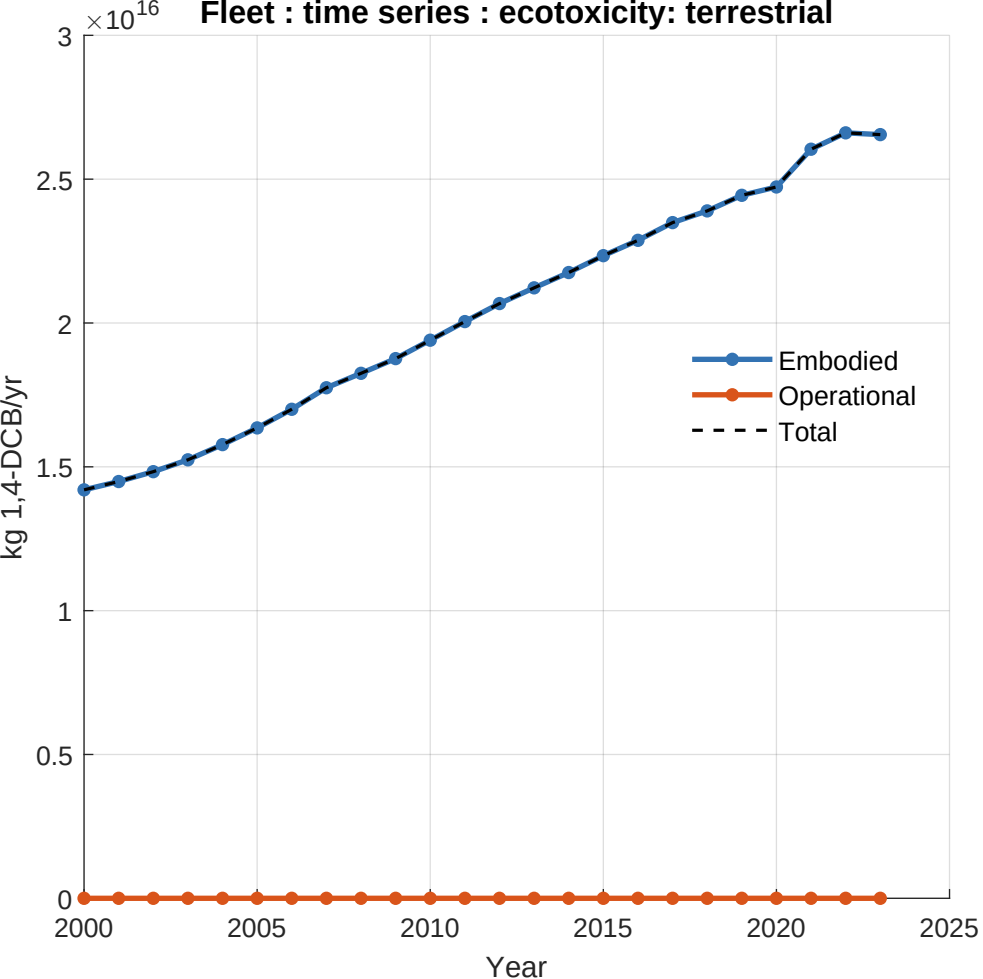

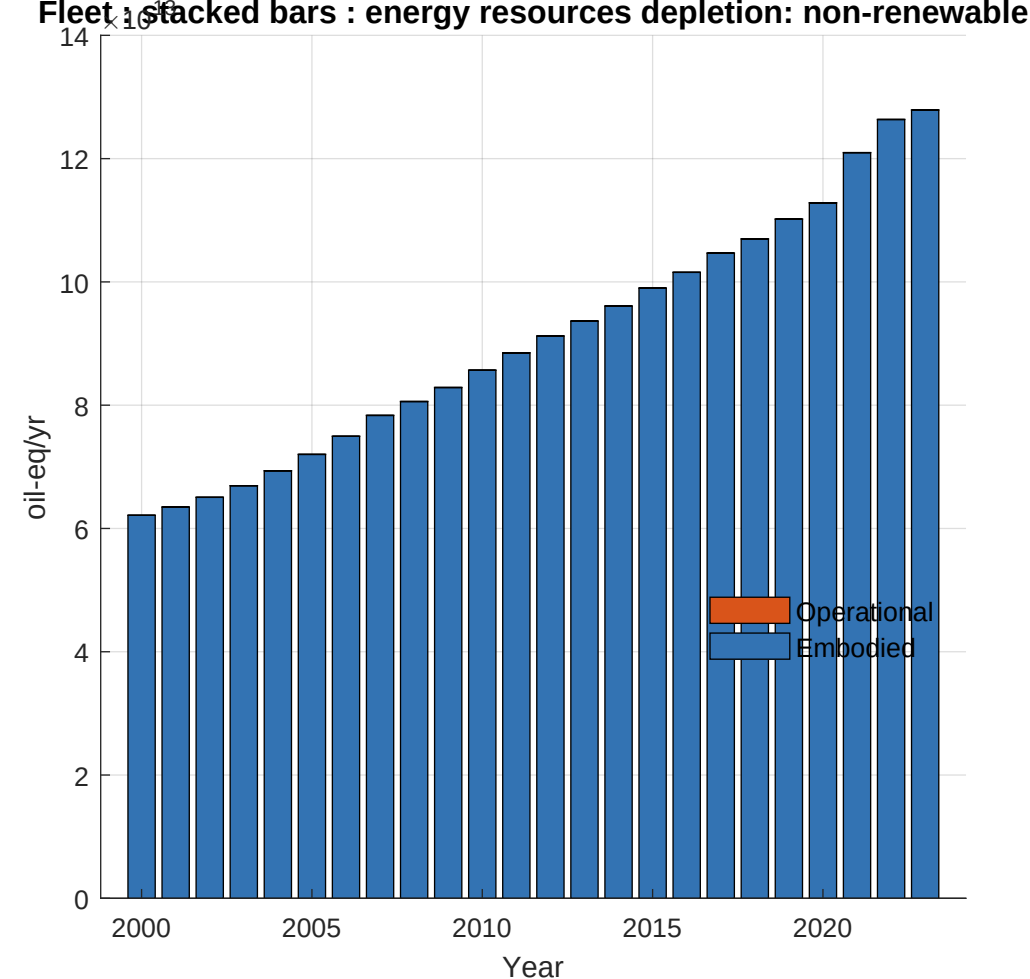

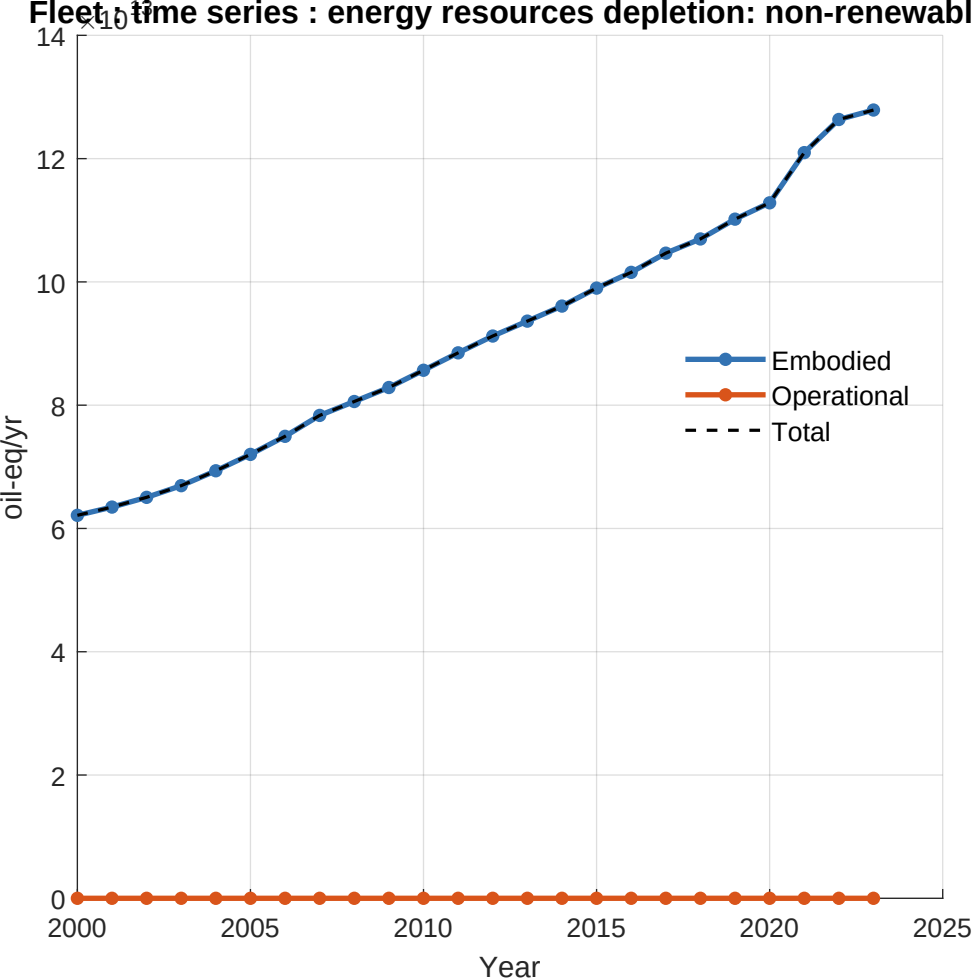

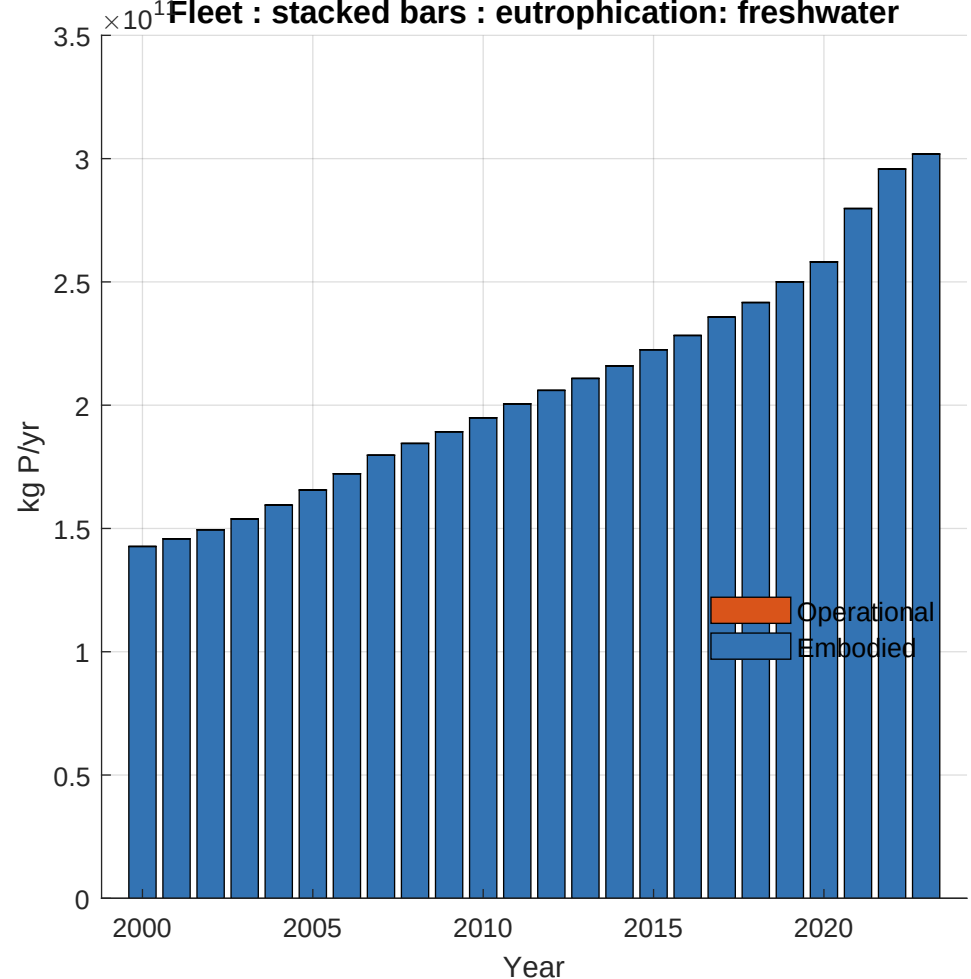

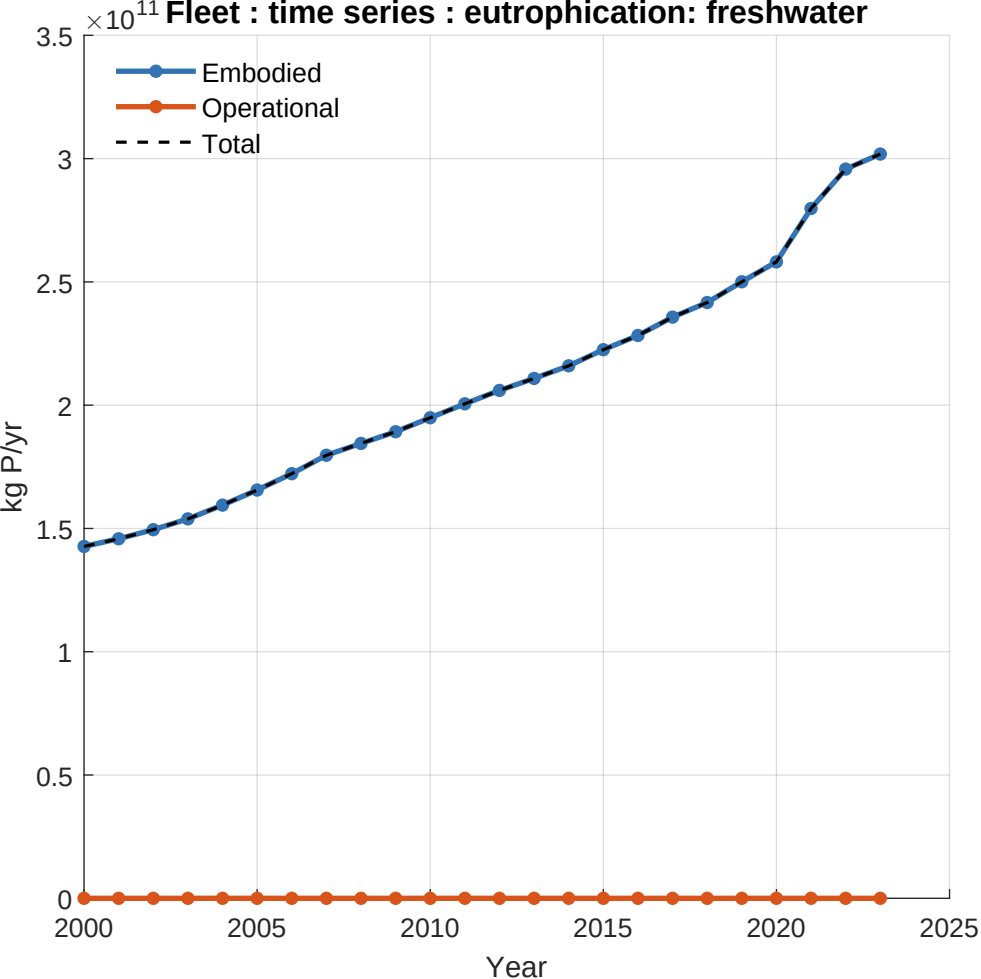

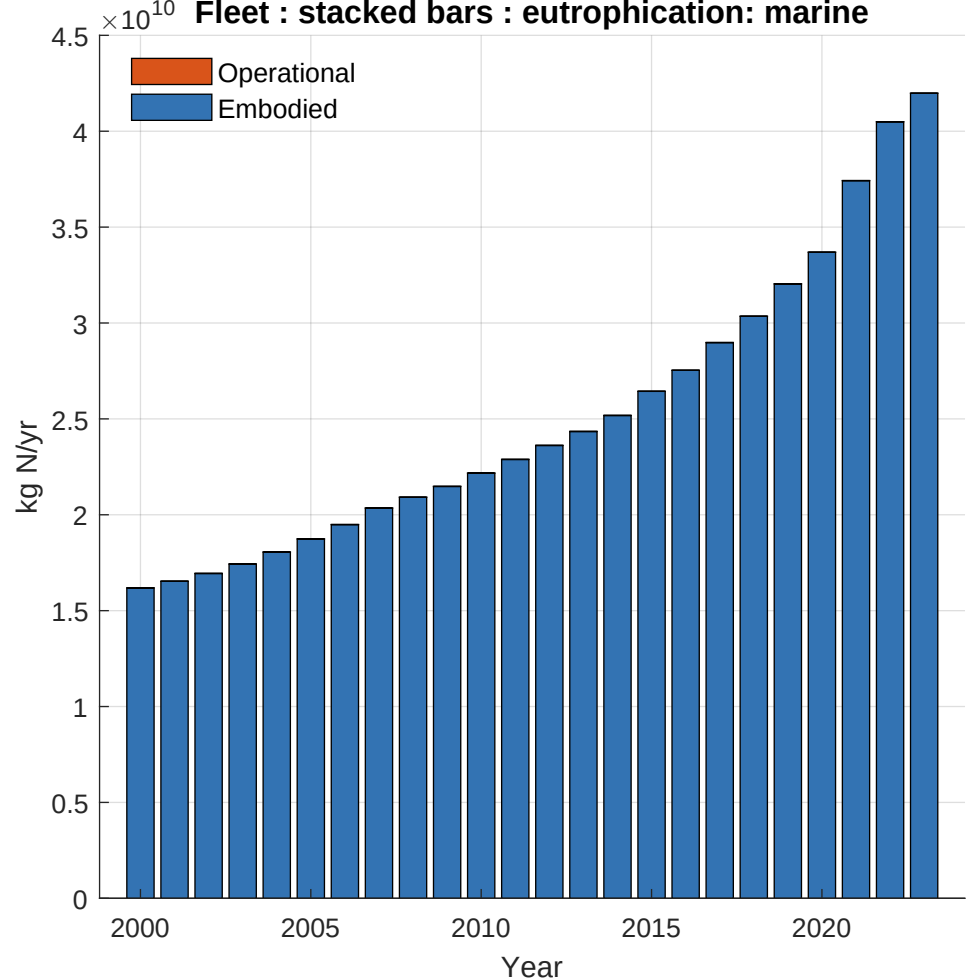

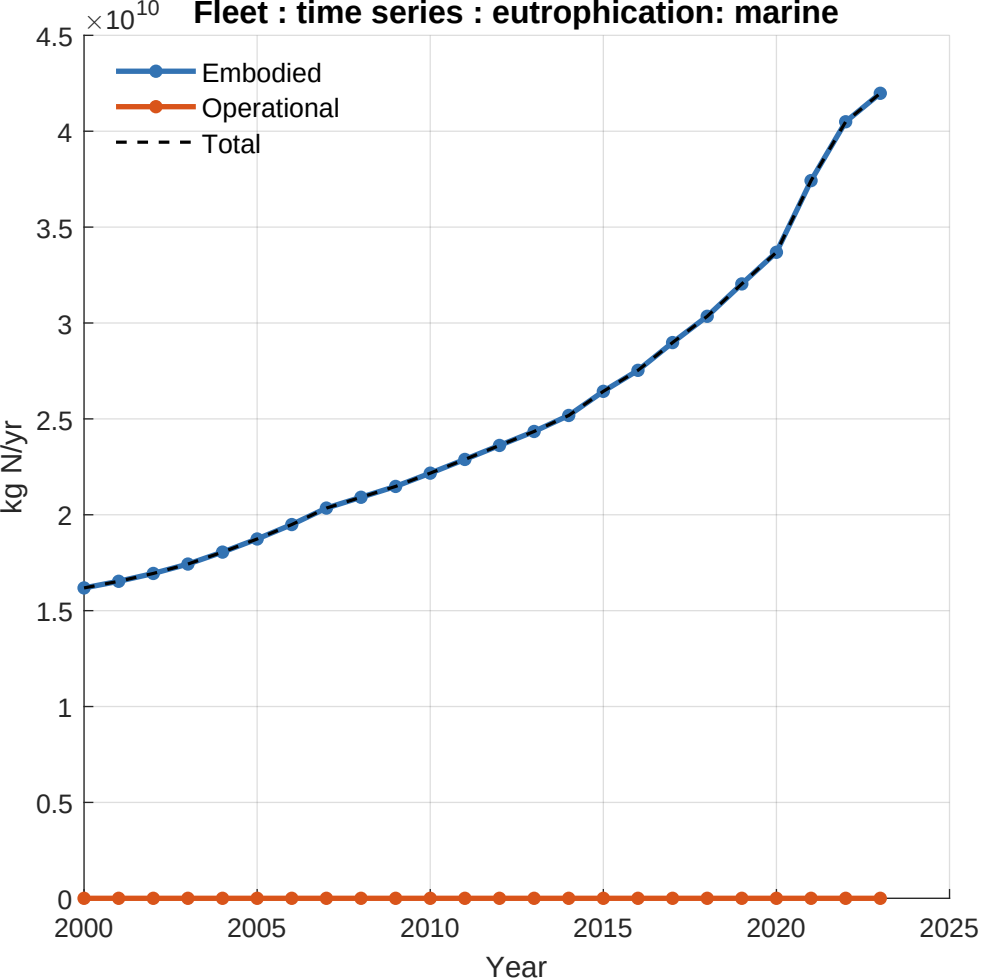

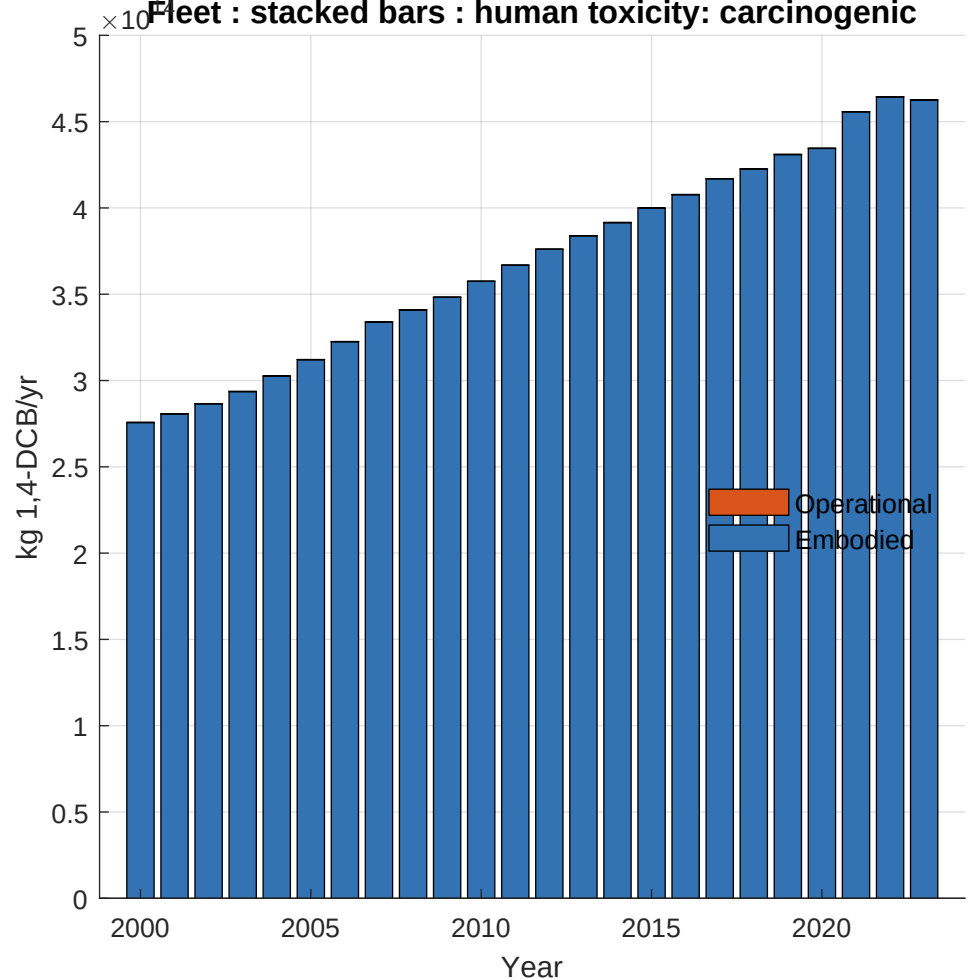

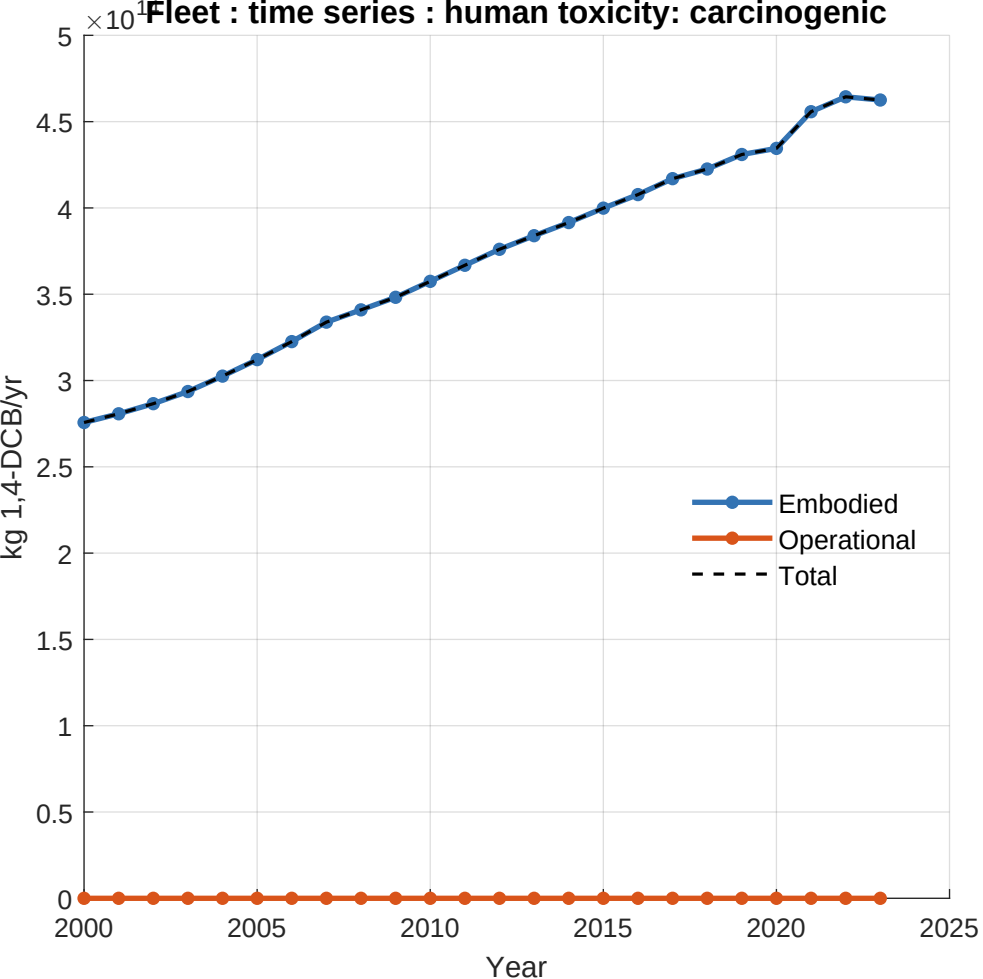

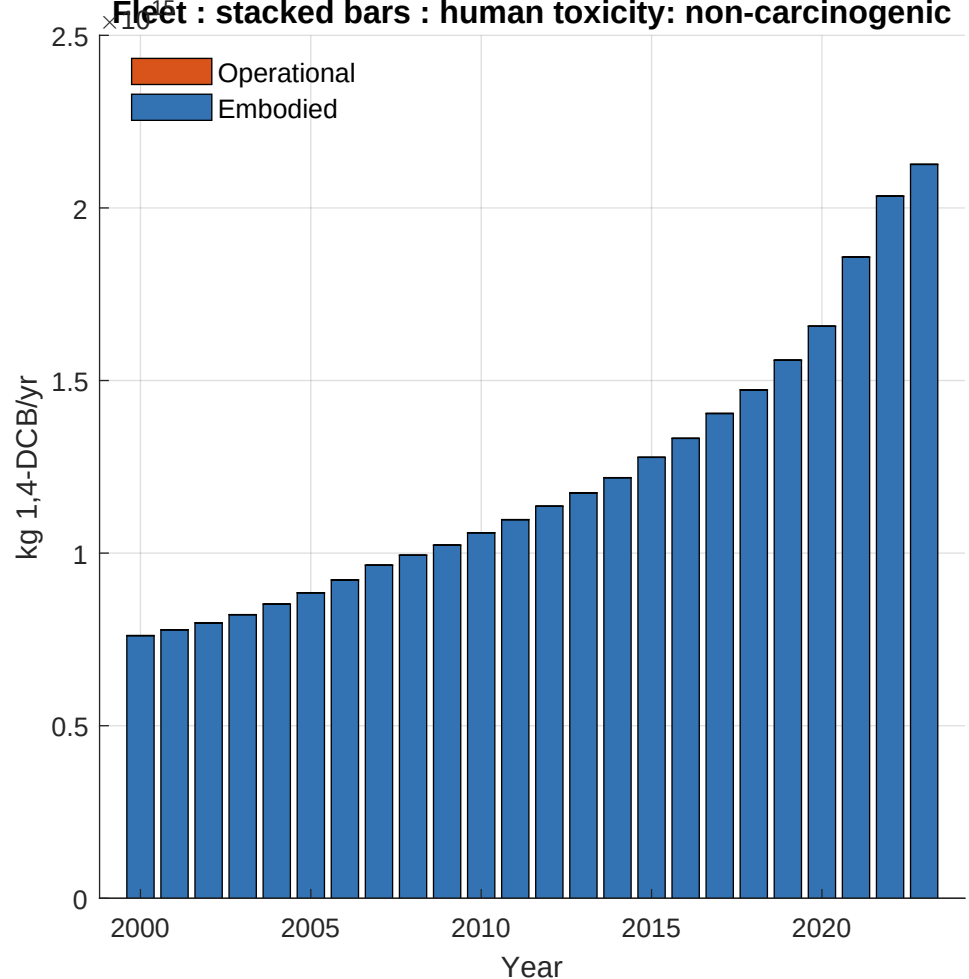

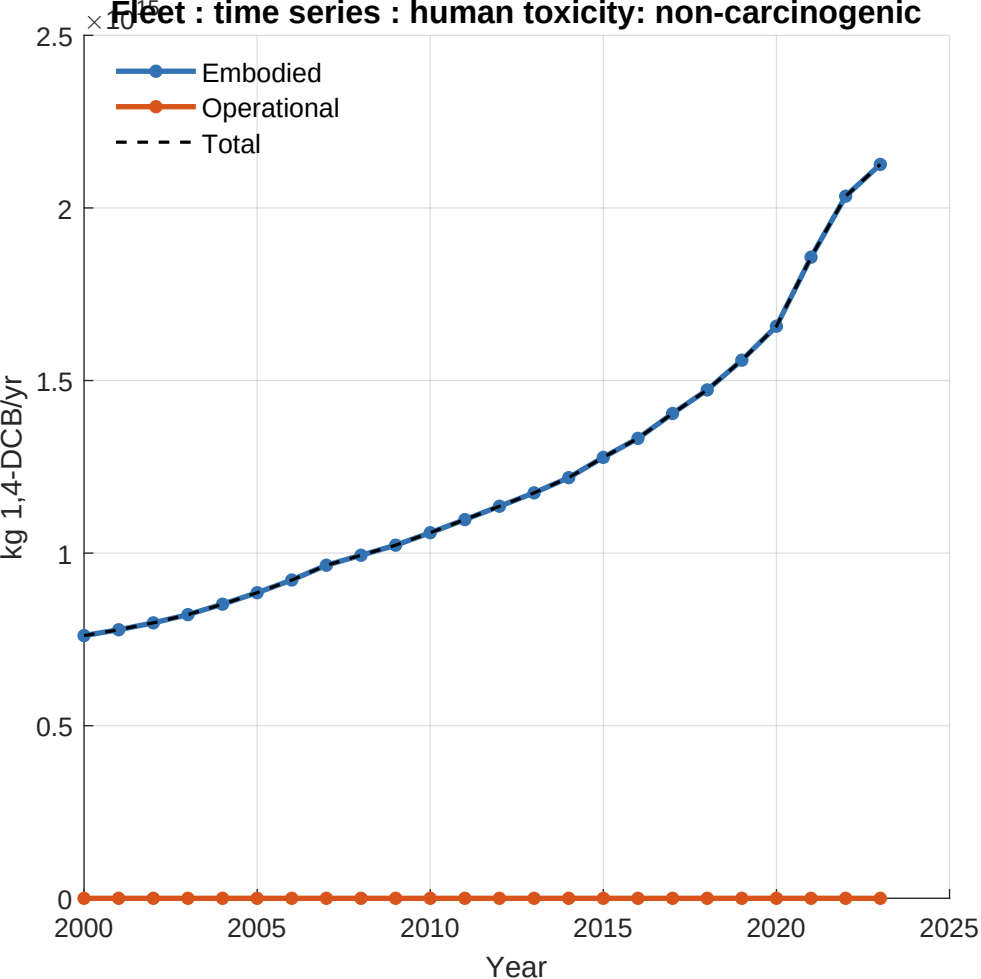

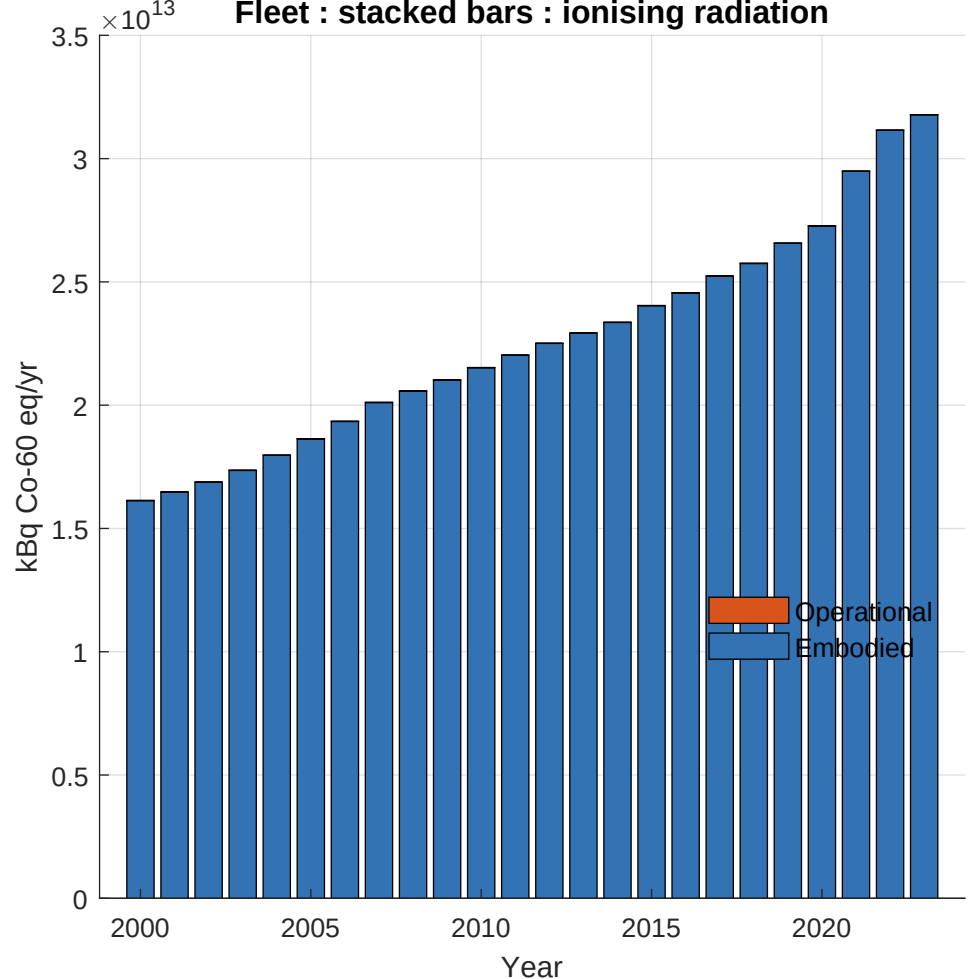

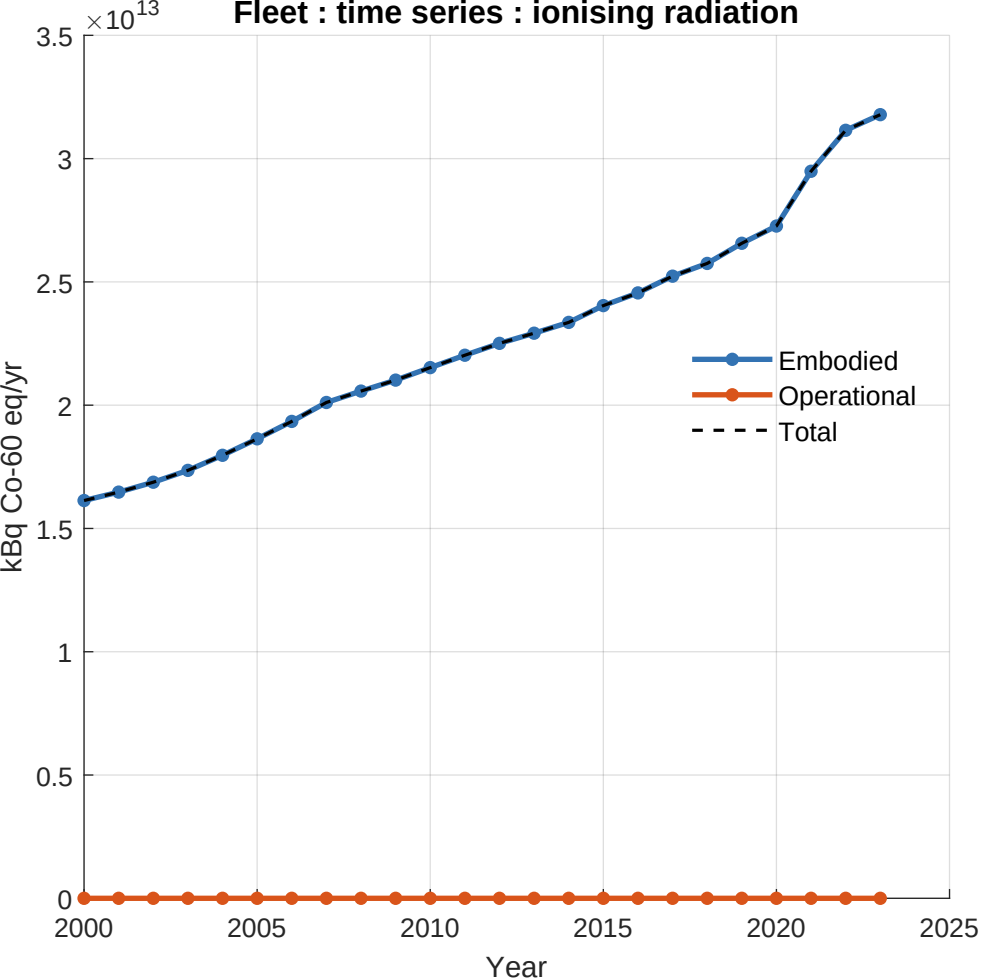

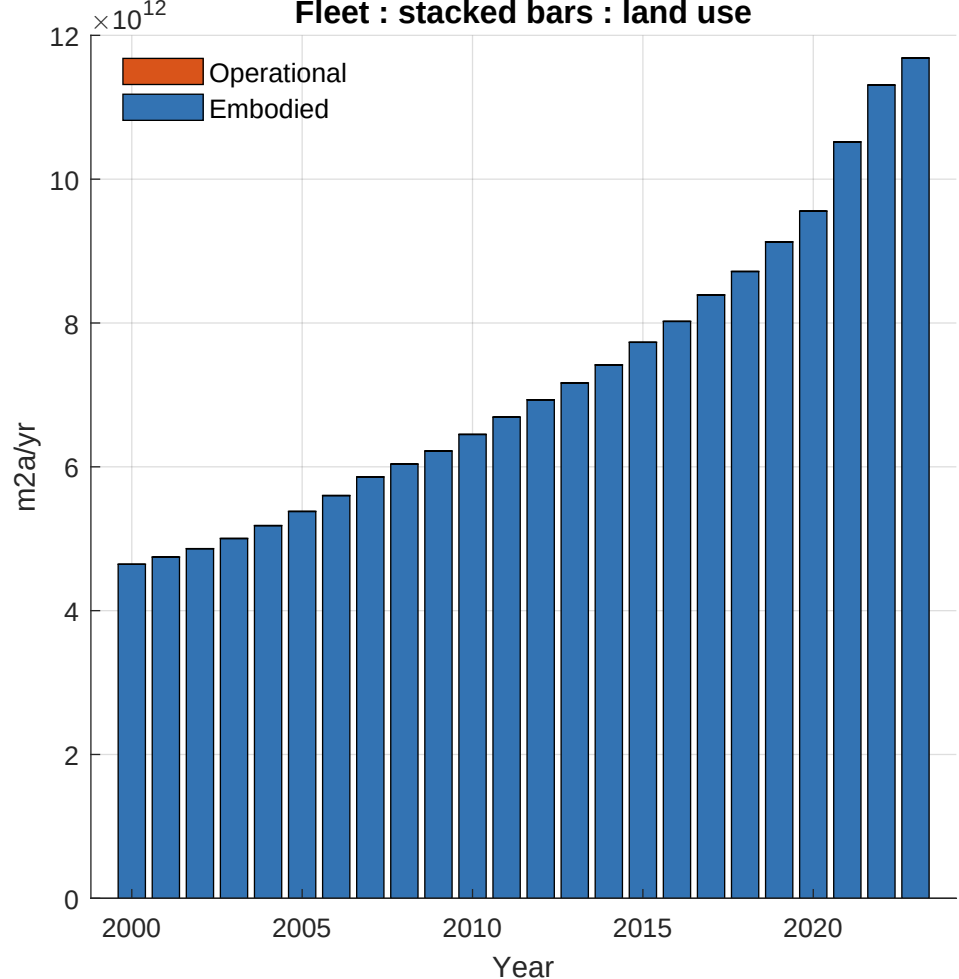

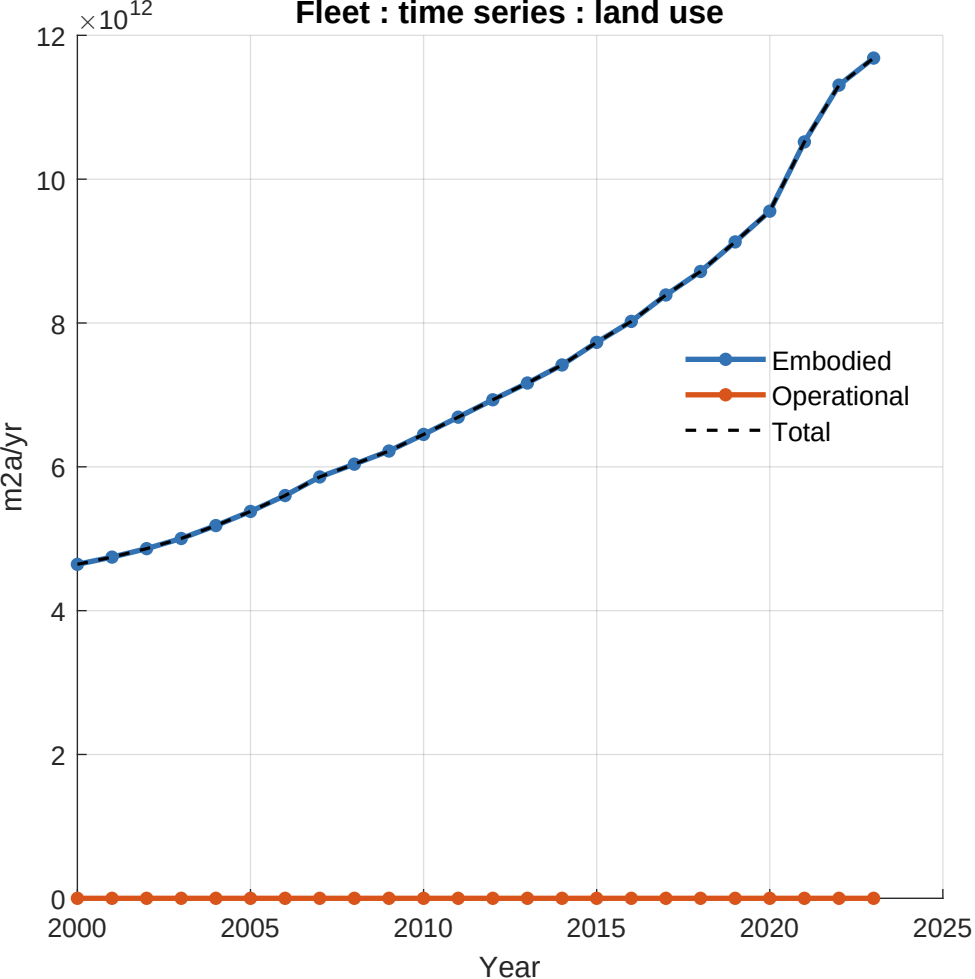

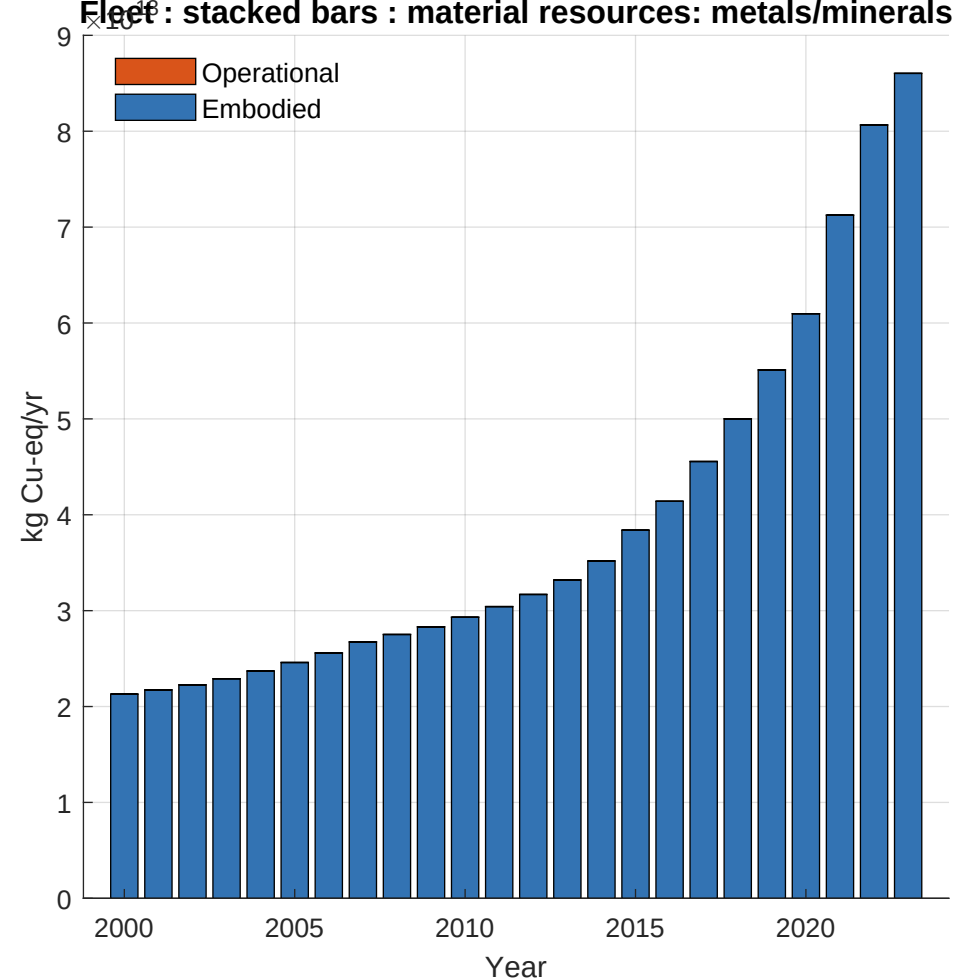

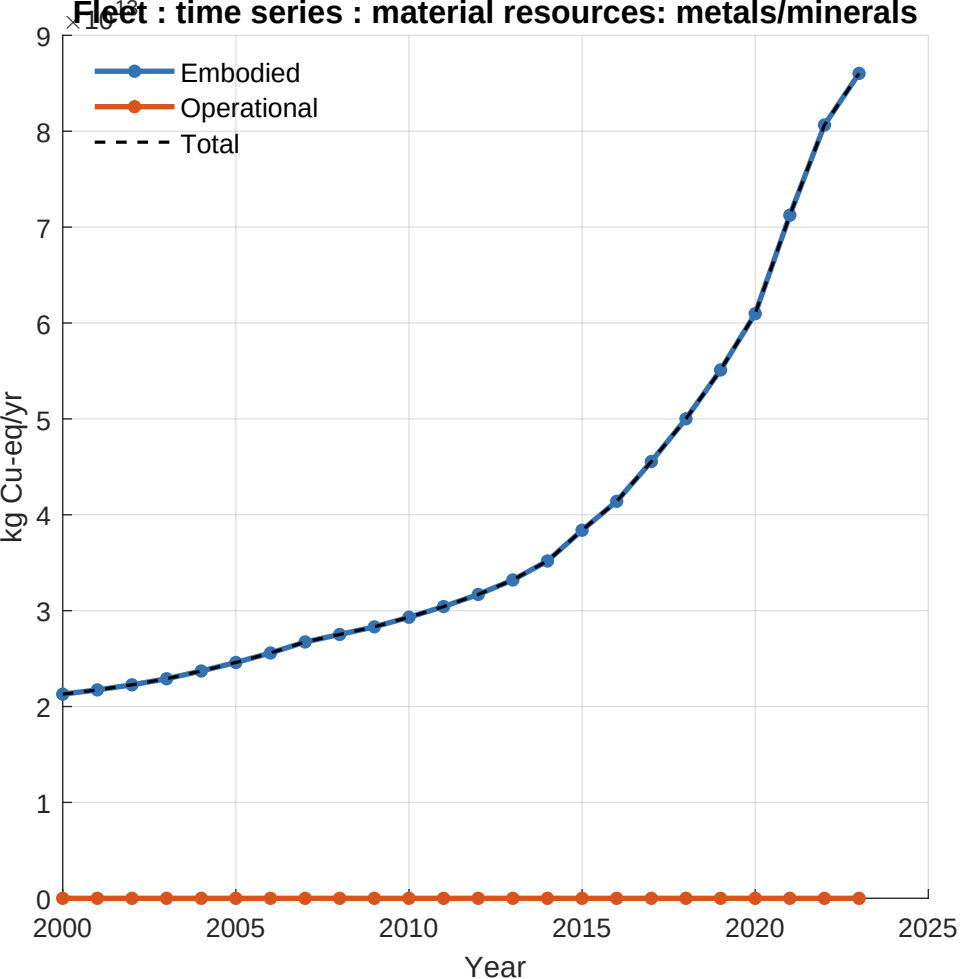

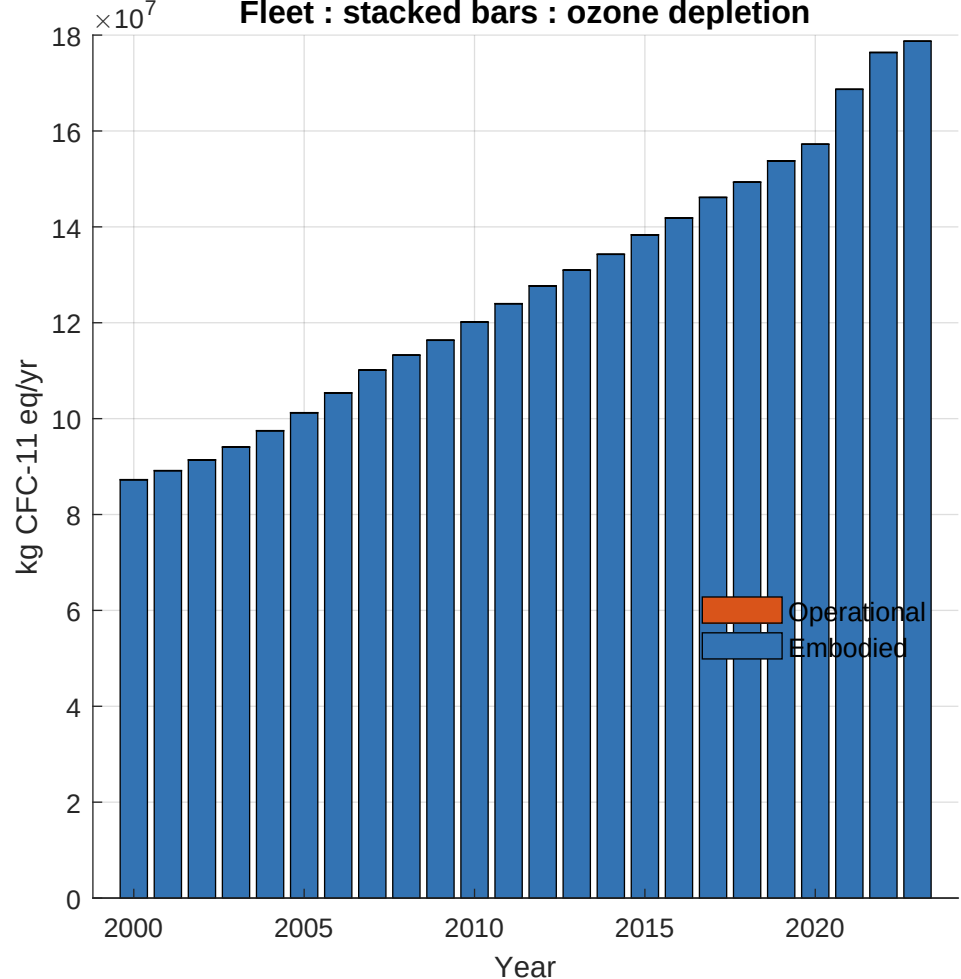

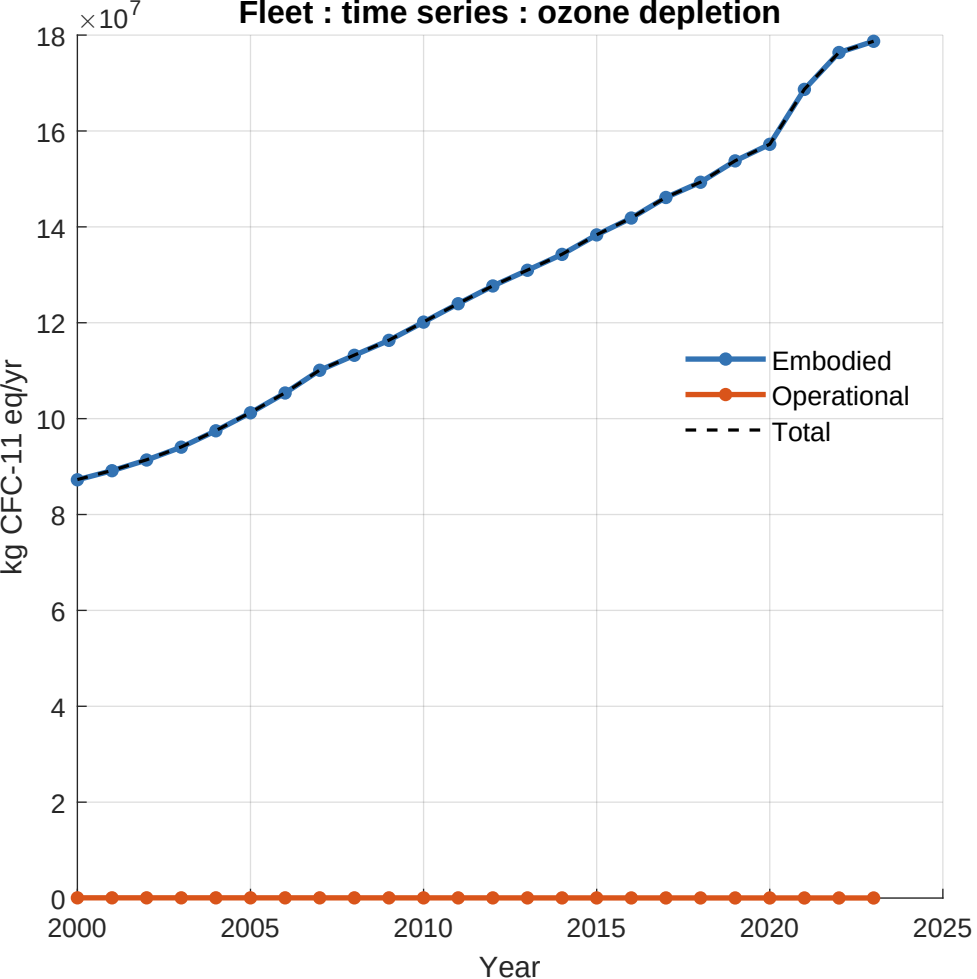

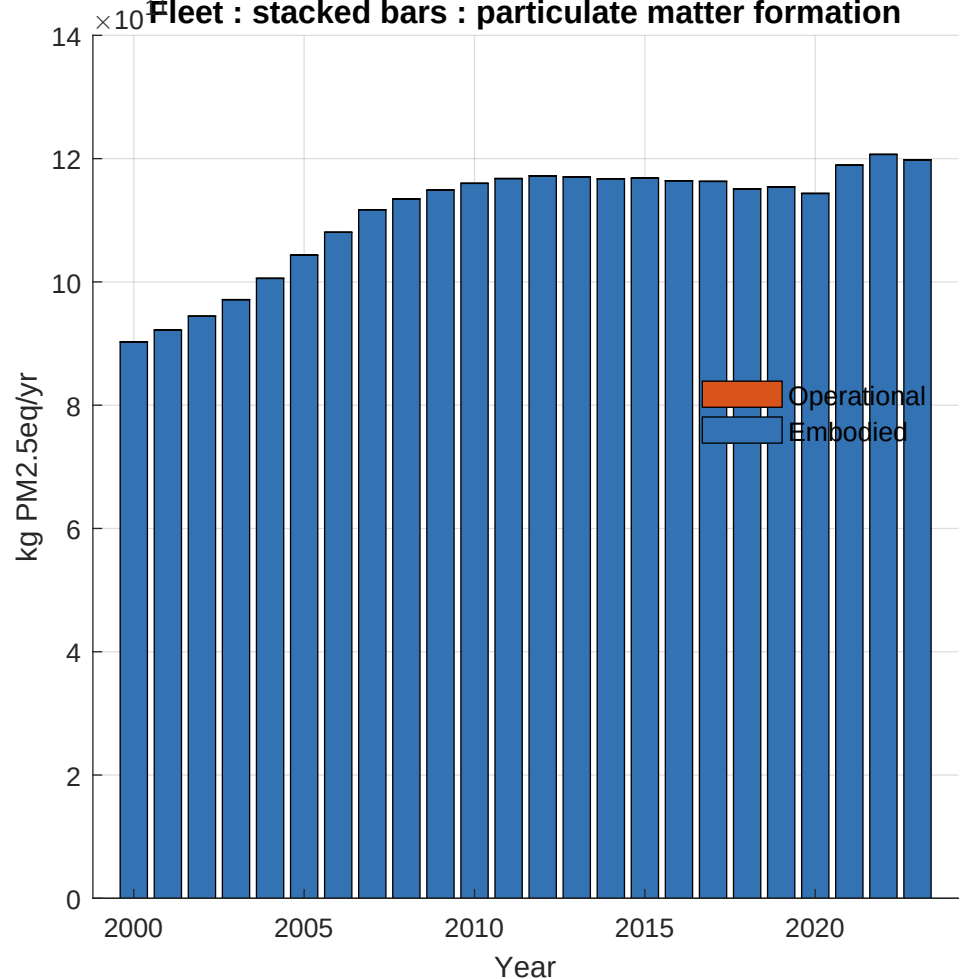

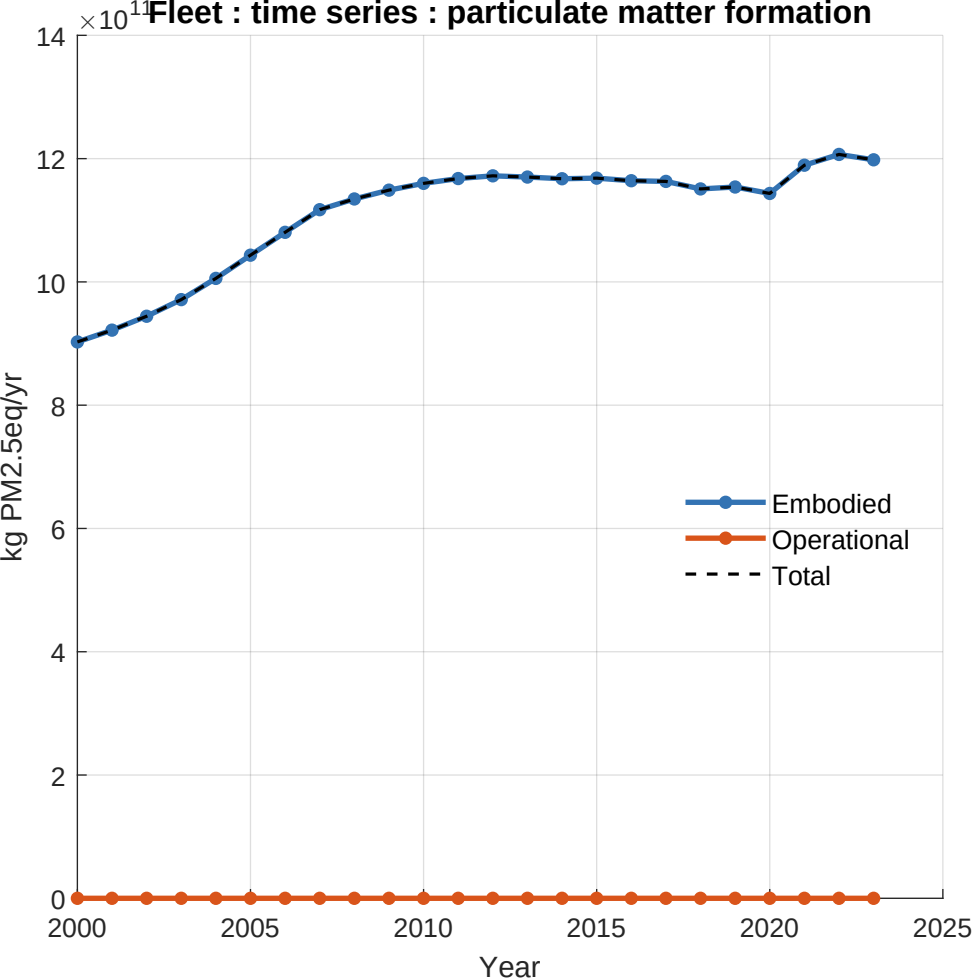

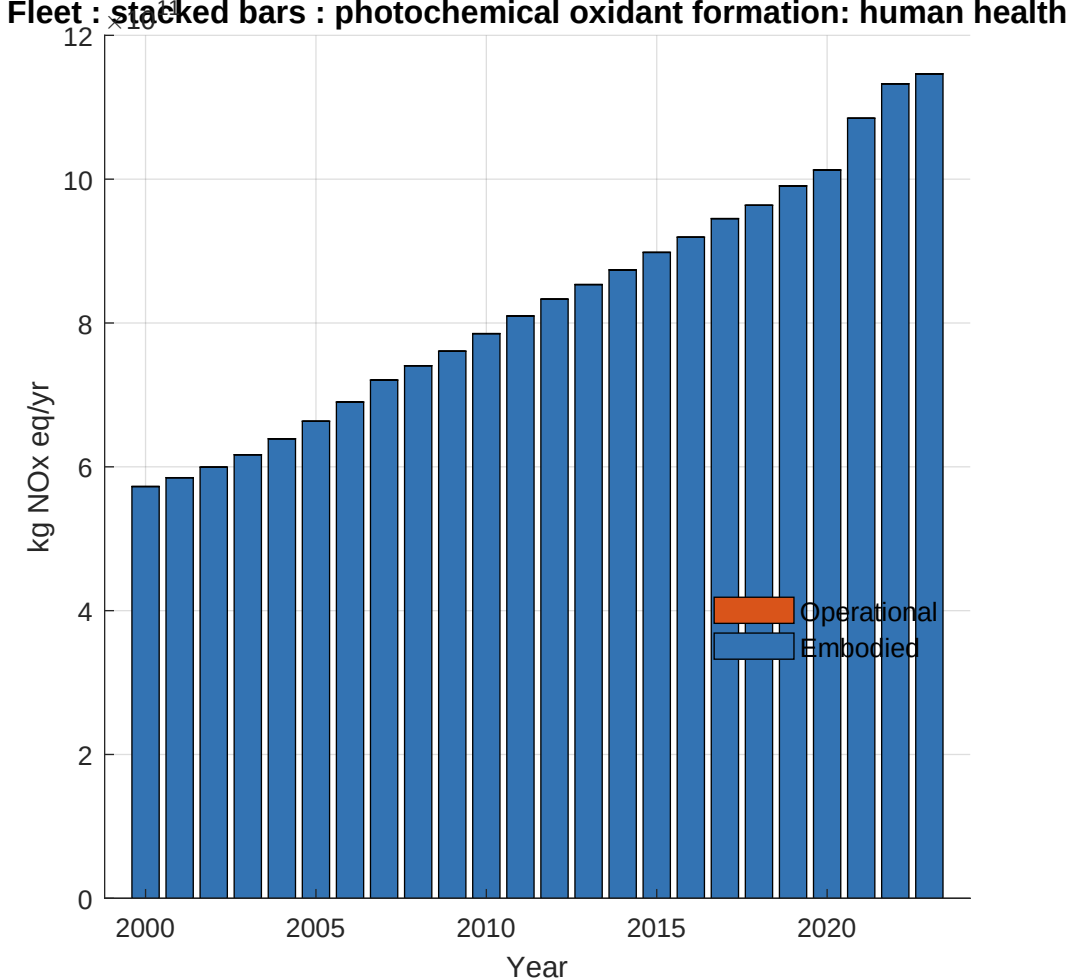

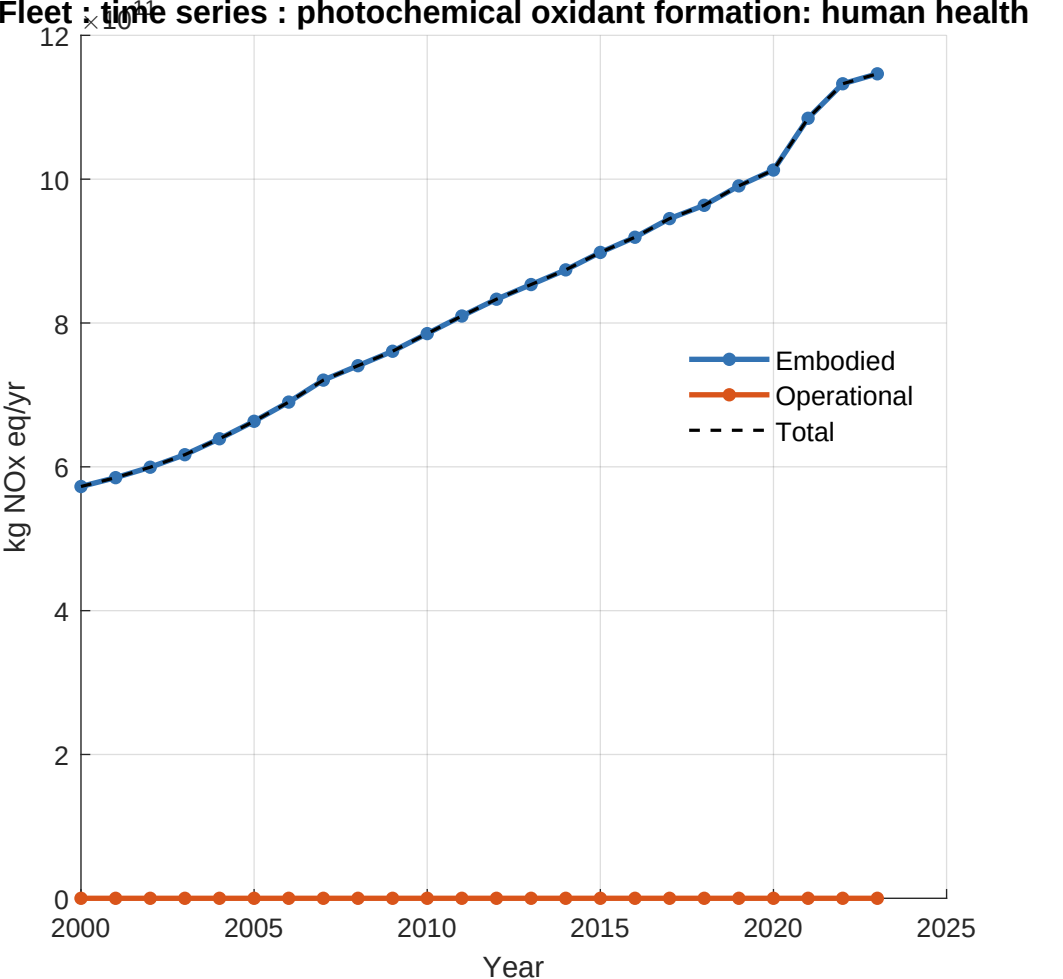

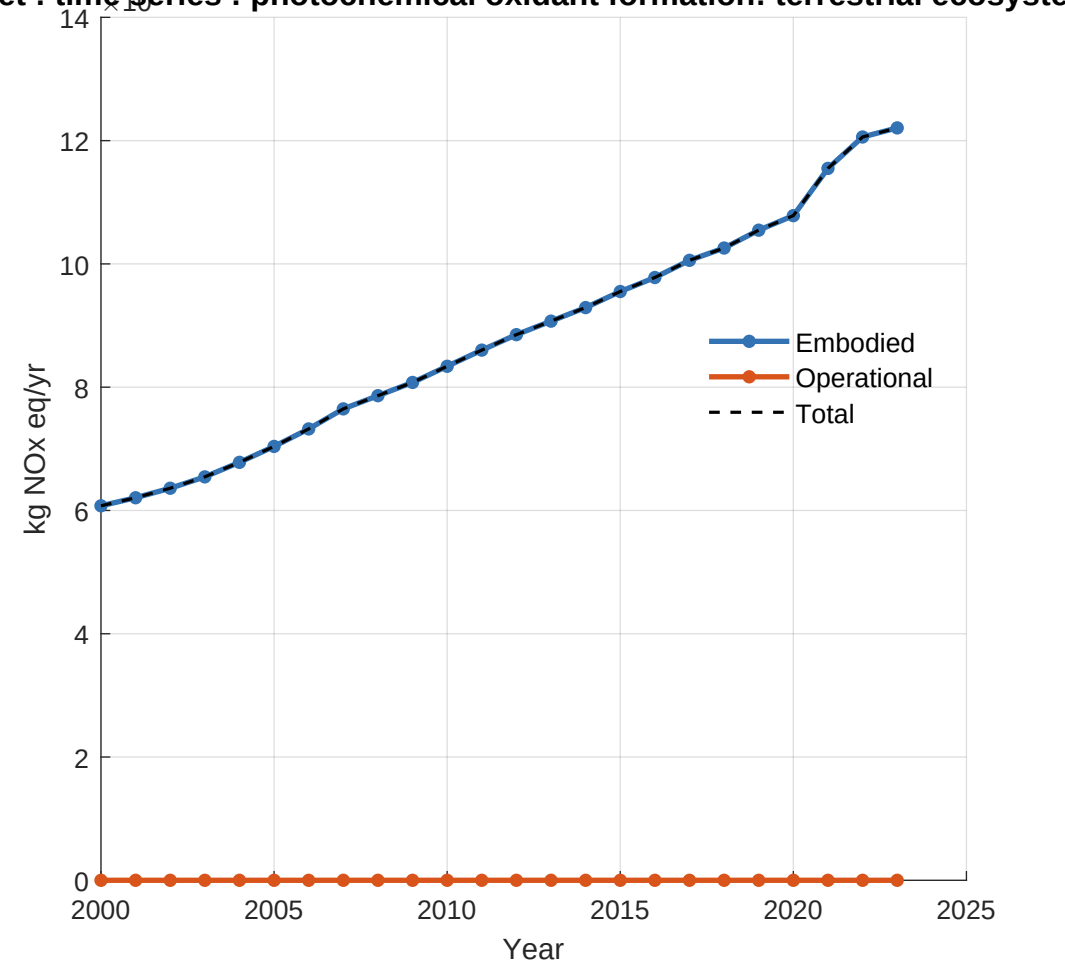

Fleet : time series : photochemical oxidant formation: terrestrial ecosystems

Fleet : stacked bars : photochemical oxidant formation: terrestrial ecosystems
